Re	Revision History							

1 Introduction

1.1 Overview

This document describes Binary Order Entry (BOE), the Cboe proprietary order entry protocol.

Where applicable, the terminology (e.g., time in force) used in this document is similar to that used by the FIX protocol to allow those familiar with FIX to more easily understand BOE. This document assumes the reader has basic knowledge of the FIX protocol.

BOE fulfills the following requirements:

- *CPU and memory efficiency.* Message encoding, decoding, and parsing are simpler to code and can be optimized to use less CPU and memory at runtime.
- Application level simplicity. State transitions are simple and unambiguous. They are easy to apply to a Member's representation of an order.
- Session level simplicity. The session level protocol (login, sequencing, replay of missed messages, logout) is simple to understand.

While Cboe has strived to preserve feature parity between FIX and BOE where possible, some features may only be available in one protocol or the other.

All binary values are in little Endian (used by Intel x86 processors), and not network byte order.

Each message is identified by a unique message type. Not all message types are used in all Cboe's trading environments globally. A listing of the supported message types is provided in 'Section 10 - List of Message Types'.

All communication is via standard TCP/IP.

Please refer to the <u>Cboe Options Exchange Integration Website</u> for additional details regarding upcoming changes in support of the migration of Cboe Options Exchange to the Bats technology platform.

1.2 Document Format

Blue highlighted sections highlight key differences between the Cboe US Options Exchanges (BZX Options Exchange "BZX", Cboe Options Exchange "C1", C2 Options Exchange "C2", and EDGX Options Exchange "EDGX").

1.3 Hours of Operation

All times noted are Eastern time zone (ET) based.

See the respective exchange websites for holiday schedules.

Cboe Options Exchanges support a Pre-Market Queuing Session that allows orders to be entered and queued prior to the start of the Global Trading Hours ("GTH") session and the Regular Trading Hours ("RTH") session.

For more information on the Cboe Opening Process, please refer to the Cboe Opening Process Specification.

Cboe Options Exchanges do not support a closing auction, but do support extended trading for options on select ETF and index products. All orders remaining after the Regular Trading Session that are not eligible for Extended Trading will be cancelled automatically. All orders remaining after the Extended session will be cancelled automatically. Members will receive Order Cancelled messages for all automatically cancelled orders.

1.4 Data Types

The following data types are used by BOE. The size of some data types varies by message. All data types have default values of binary zero, in both Member to Cboe and Cboe to Member contexts.

- Binary: Little Endian byte order, unsigned binary value. The number of bytes used depends on the context.
 - One byte: FE = 254
 - Four bytes: 64 00 00 00 = 100
- Signed Binary: Little Endian byte order, signed two's complement, binary value. The number of bytes used depends on the context.
 - One byte: DF = -33
 - Four bytes: 64 00 00 00 = +100
- Binary Price: Little Endian byte order value, signed two's complement, eight bytes in size, with four implied decimal places. So, if the value is –123,400, the actual value taking into account implied decimal places is –12.34.
 - 08 E2 01 00 00 00 00 00 = 123,400/10,000 = 12.34
 - F8 1D FE FF FF FF FF FF = -123,400/10,000 = -12.34
- Short Binary Price: Little Endian byte order value, signed two's complement, four bytes in size, with four implied decimal places. So, if the value is 12,300, the actual value taking into account implied decimal places is 1.23.
 - 0C 30 00 00 = 12,300/10,000 = 1.23
- Signed Binary Fee: Little Endian byte order value, signed two's complement, eight bytes in size, with five implied decimal places. So, the value is -123,000 is -1.23 after taking account for the five implied decimal places.
 - 88 1F FE FF FF FF FF FF = 123,000/100,000 = -1.23
- Alpha: Uppercase letters (A-Z) and lowercase letters (a-z) only. ASCII NUL (0x00) filled on the right, if necessary. The number of bytes used depends on the context.
- Alphanumeric: Uppercase letters (A-Z), lowercase letters (a-z) and numbers (0-9) only. ASCII NUL (0x00) filled on the right, if necessary.
- Text: Printable ASCII characters only. ASCII NUL (0x00) filled on the right, if necessary.
- DateTime: 8 bytes. The date and time, in UTC, represented as nanoseconds past the UNIX epoch (00:00:00 UTC on 1 January 1970). The nanoseconds portion is currently ignored and treated as 0 (i.e. the times are

©2019 Cboe Global Markets, Inc.

only accurate to microseconds) on input, and will always be set to 0 by Cboe in outgoing messages. However, Cboe may begin populating the nanoseconds portion at any time without warning.

For example: 1,294,909,373,757,324,000 = 2011-01-13 09:02:53.757324 UTC.

• *Date:* Little Endian byte order, unsigned binary value, 4 bytes in size. The YYYYMMDD expressed as an integer.

1.5 Optional Fields and Bit fields

Some messages such as New Order and Modify Order have a number of optional fields. A count and number of bitfields in the message specify which optional fields will be present at the end of the message. If a bit is set, the field will be present. Fields are appended to the end of the message. There is no implicit framing between the optional fields. In order to decode the optional fields, they must be appended in a particular order to the end of the message. The fields of the first bitfield are appended first, lowest order bit first. Next, the fields of the next bitfield are appended, lowest order bit first. This continues for all bitfields. While certain reserved bits within a defined bitfield are used within another Cboe market and will be ignored, bits that are reserved for future expansion must be set to 0 when noted in the bitfield description.

The size, data type, and values for each field are described in 'Section 7 – List of Optional Fields'.

Note that the set of optional fields returned for each Cboe to Member message type is determined at session login (using the Login Request message); hence, the exact size and layout of each message received by the client application can be known in advance. Any requested optional field, which is irrelevant in a particular context, will still be present in the returned message, but with all bytes set to binary zero (0x00).

Each return message from Cboe to Member indicates the optional fields which are present, even though the Member indicated during login which optional fields are to be sent. The reason for the inclusion (and duplication) is so that each message can be interpreted on its own, without having to find the corresponding login request or response to know which optional fields are present. So, for example, in a log file, decoding a message requires only that single message.

Example messages are shown with each message type, which should help to make this concept clear.

1.6 Protocol Features

1.6.1 Complex Instruments and Signed Prices (C1, C2, and EDGX only)

All price fields in the BOE protocol are signed values capable of accommodating complex instruments that can be negative (See Data Types) for a description and an example of using the Binary Price type with a negative price). For an example of the use of the Binary Price type with negative price values in an application message, see the example BOE message in New Complex Order.

1.6.2 Done For Day Restatements

Good 'Til Cancel ("GTC") and Good 'Til Day ("GTD") orders can result in order persisting between sessions. The Cboe BOE protocol provides a mechanism for clients to request end-of-day restatement of GTC/GTD orders that will be persisted to the next trading session. See Section 'Section 10 – Port Attributes' for information on available port attributes, including Done For Day Restatements.

When enabled, Done For Day Restatement messages are sent to connected clients after the trading session ends, at 4:00 ET (4:15 for select ETF's) and prior to the trading session disconnecting at 4:45 ET, for each order that will persist to the next trading session. Any time prior to the 4:45 ET cutoff, customers may send Order Cancel Request messages for any open GTC and GTD orders. All other order message types received after the market closes at 4:00 ET (4:15 ET for select ETF's) will be rejected.

Done For Day Restatements are represented using Order Acknowledgement messages with the following optional attributes set:

©2019 Choe Global Markets, Inc.

- BaseLiquidityIndicator = A (Added Liquidity), bitfield 5, bit position 7
- SubLiquidityIndicator = D (Done For Day), bitfield 7, bit position 1

To receive Done For Day Restatements, the Done For Day Restatement port attribute must be set (contact Cboe Trade Desk), and customers must register to receive BaseLiquidityIndicator and SubLiquidityIndicator optional fields on Order Acknowledgement messages via the Logon Request message (See 'Section 3.1.1 – Login Request' for details on registering to receive optional fields on a per-message basis). If the Done For Day Restatement port attribute is set and the bitfield Logon Message registration for the Order Acknowledgement message does not include but BaseLiquidityIndicator and SubLiquidityIndicator, the logon attempt will fail.

1.6.3 Carried Order Restatements

Good 'Til Cancel ("GTC") and Good 'Til Day ("GTD") orders can result in orders persisting between sessions. The Cboe BOE protocol provides a mechanism for clients to request restatement of orders that have been carried forward from the previous business day trading session. See 'Section 11 – Port Attributes' for information on available port attributes, including 'Carried Order Restatements'.

When enabled, Carried Order Restatements are sent to connected clients for each product on the Options Exchange for which orders have been carried forward from the previous business day trading session. Carried Order Restatements are sent after connection establishment and before regular trading activity messages on a per-product basis.

Carried Order Restatements are represented using Order Acknowledgement messages with the following optional attributes set:

- BaseLiquidityIndicator = A (Added Liquidity), bitfield 5, bit position 7
- SubLiquidityIndicator = C (Carried), bitfield 7, bit position 1

To receive Carried Order Restatements, the Carried Order Restatement port attribute must be set (contact CFE Trade Desk), and customers must register to receive BaseLiquidityIndicator and SubLiquidityIndicator optional fields on Order Acknowledgement messages via the Logon Request message (See 'Section 3.1.1 – Login Request' for details on registering to receive optional fields on a per-message basis). If the Carried Order Restatement port attribute is set and the bitfield Logon Message registration for the Order Acknowledgement message does not include but BaseLiquidityIndicator and SubLiquidityIndicator, the logon attempt will fail.

1.6.4 Display Indicator Features

Display-Price Sliding (BZX Only)

If the original limit price of the unexecuted remainder of a day order does not lock or cross the NBBO then Cboe works the order at the original limit price while displayed at the nearest permissible quoting increment. If the original limit price does lock or cross the NBBO then Cboe makes available Display-Price Sliding.

Display-Price Sliding adjusts the original limit price on entry to the locking price of the NBBO. It will be ranked and worked at a price locking the NBBO but will temporarily adjust the displayed price to the nearest permissible quoting increment. When the NBBO widens, the display price will be readjusted to the adjusted limit price. The display price may be temporarily less aggressive than the adjusted limit price or working price.

Multiple Display-Price Sliding does not permanently adjust the original limit price on entry, but allows for Display-Price slid orders to continue to have their display **and** working prices adjusted towards their original limit price based on changes to the prevailing NBBO.

Contra-side Post Only orders that are received when a Display-Price Slid order is working at a locking price with the NBBO will not result in a reject of a contra-side Post Only order but will instead result in the working price of the Display-Price Slid order to be repriced to one penny away from the locking price.

Price Adjust (BZX, C1, C2, and EDGX)

If the limit price of an order does not lock or cross the NBBO, then the order will be ranked and displayed at the nearest permissible quoting increment.

©2019 Cboe Global Markets, Inc.

If the limit price of a Price Adjust eligible order locks or crosses the NBBO, the limit price will be adjusted on entry to the locking price of the NBBO, while the displayed price and ranked price will be temporarily adjusted to the nearest permissible quoting increment. Price Adjust orders will never be ranked at the locking price or at a non-displayable price increment. If the NBBO widens, the displayed price and ranked price will be readjusted to the adjusted limit price.

The limit price of a Multiple Price Adjust order will not be permanently adjusted on entry if the limit price crosses the NBBO. The displayed price and ranked price will be the nearest permissible quoting increment and will be adjusted towards the original limit price based on changes in the prevailing NBBO.

NoRescrapeAtLimit (BZX Only)

Applicable only to fully routable IOC orders (9303=R and 59=3). After walking the price down to the limit, there will be no final scrape at Cboe and the cancel code will state "X: Expired" rather than "N: No Liquidity".

1.6.5 Risk Root

This document refers to the term "Risk Root" to describe Cooe Options Risk Management functionality that is applied at the symbol-level. The Risk Root is defined as the underlying symbol.

This impacts what value must be sent in the defined *RiskRoot* fields when performing a mass cancel or a reset of a risk trip.

See the Risk Management Specification for more details.

1.6.6 Cabinet and Sub-Cabinet Orders (C1 Only)

Cabinet orders are identified via *PriceType* = "0" and must have a valid *TimeInForce* of "Day", "GTC", "GTD" or "IOC". All non-IOC Cabinet orders are required to set *OpenClose* = "C". Cabinet orders will only trade with other cabinet orders on the book or floor depending on *FloorRoutingInst* and *FloorDestination* values.

1.6.6.1 Valid Pricing

Orders in non-penny classes must have a limit price **less than or equal to** \$0.01 and orders in penny classes must have a limit price **less than** \$0.01. Limit prices may be up to 4 decimal places.

1.6.6.2 Invalid Pricing

Orders in penny or non-penny classes priced **greater than** \$0.01 and orders in penny classes priced **equal to** \$0.01 will be rejected. Orders with a limit price that locks or crosses a resting non-cabinet order will be rejected.

1.6.6.3 Market Data

Cabinet orders or executions will not be disseminated on OPRA but will be available on http://cdn.cboe.com/resources/membership/US_EQUITIES_OPTIONS_MULTICAST_PITCH_SPECIFICATION.pdf and http://cdn.cboe.com/resources/membership/US_OPTIONS_MULTICAST_TOP_SPECIFICATION.pdf feeds.

1.6.7 Auction Orders

For more information on the following Auction Only Orders, please refer to the Opening Process Specification.

Order Type	Order Entry Details		
Market-On-Open (MOO)	OrdType = 1 (Market)	TimeInForce = 2 (At the open)	
Limit-On-Open (LOO)	OrdType = 2 (Limit) Price = [price]	TimeInForce = 2 (At the open)	
Settlement Liquidity On Open (SLOO)	OrdType = 2 (Limit) Price = [price]	TimeInForce = 2 (At the open) ExecInst = r (Settlement Liquidity)	

All Rights reserved

9

1.6.8 Port Types

All BOE port types may be ordered through the Customer Web Portal using the **Logical Port Request** tool. Changes to port attributes may be requested through the same tool by submitting a 'Modify' request for one or more existing BOE ports.

1.6.8.1 BOE Order Ports

Standard BOE ports support simple and complex order entry but do not support the usage of the following message types: Quote Update, Purge Orders. The attempted usage of any of these message types on standard BOE order ports will result in a rejection of the disallowed message.

Standard BOE ports are limited to 5,000 inbound messages per second. Once the inbound limit is reached new orders are rejected, modifies are handled as cancels, and cancels are processed normally.

1.6.8.2 BOE Bulk Quoting Ports

BOE Bulk Quoting ports are intended for use by firms quoting large numbers of simple options series. As a result, they are unthrottled. However, firms may still experience poor performance on Bulk Quoting ports if excessive message traffic is sent.

The *PreventMatch* field may not be specified on the Quote Update message and Match Trade Prevention is only available if defaulted at the port level. For Bulk Quoting ports, only Cancel Newest, Cancel Oldest, or Cancel Both are permitted. If a Bulk Quoting port is not configured with both a default MTP Modifier and Unique ID Level, Match Trade Prevention will be disabled.

Bulk Quoting Port Order Acceptance Table

Message	Simple/Complex	Accepted over Bulk Quoting Port?	Other Conditions
Quote Update	Simple	Yes	
Quote Update (short)	Simple	Yes	
New Order	Simple	Yes	Must have a <i>TimeInForce</i> value of Day or GTD with a same day expiration on C1, C2, and EDGX.
New Order (Auction Response)	Simple	Yes	
New Order Cross (AIM or QCC)	Simple	No	
New Order Cross Multileg	Simple	No	
Purge Orders	Simple/Complex	No	
Reset Risk	Simple/Complex	Yes	
New Complex Instrument	Complex	Yes	
Quote Update	Complex	No	
New Complex Order	Complex	Yes	Must be Post Only (RoutingInst = P). Must have a TimeInForce value of Day or GTD with a same day expiration on C1, C2, and EDGX.
New Complex Order (COA Response)	Complex	Yes	

©2019 Cboe Global Markets, Inc.

Bulk Quoting Port Quote/Order Behavior Matrix

The following matrix describes the liquidity removal behavior of quotes and orders sent on Bulk Quoting ports. Bulk Quoting ports will be available for use by all customers. Only registered Market Makers will be allowed to use quotes for liquidity removal. Orders sent on Bulk Quoting Ports will be allowed to remove liquidity only on BZX Options. On C1, C2, and EDGX Options, only registered Market Makers will be allowed to remove liquidity using New Order messages.

Once any quote or order is posted to the exchange book liquidity removal against any contra capacity will always be allowed in the case that a subsequent event causes the resting quote or order to be re-evaluated, such as the Opening/Re-Opening Process.

Originating Side (Capacity)	BZX	C2	EDGX	C1
Quote Update Seeking to Remove (M)	Allowed (ALL)	Allowed (All Except "M")	Allowed (All Except "M")	Allowed (All Except "M")
Quote Update Seeking to Remove (All Except "M")	Reject	Reject	Reject	Reject
New Order Seeking to Remove (M)	Allowed (ALL)	Allowed (All Except "M")	Allowed (All Except "M")	Allowed (All Except "M")
New Order Seeking to Remove (All Except "M")	Allowed (ALL)	Reject	Reject	Reject
Passive Quote Update or New Order (ALL)	Allowed (ALL)	Allowed (ALL)	Allowed (ALL)	Allowed (ALL)

1.6.8.3 BOE Purge Ports

BOE Purge Ports support a single message type: Purge Orders. Members may use this port type to request a cancellation of groups of orders, including orders across multiple BOE Order or Bulk Quoting ports.

1.6.9 Floor Routing (C1 Only)

All orders routed to the floor must include explicit routing instructions that includes two features: 1) floor routing instruction indicating Direct or Default routing behavior and 2) floor destination information. Floor routing behavior is specified in *FloorRoutingInst* (22303). Direct routing sends the order to the indicated PAR workstation, while default routing indicates that electronic execution is preferred, but the order may be routed to the indicated PAR if it cannot be processed electronically.

Examples of conditions which cause default routing to the Floor include:

- > a complex order having an AON contingency
- a complex order having more than 12 legs
- > a complex order with multiple underlying components
- > any FLEX order not participating in an auction
- not held orders

Floor destination instructions are specified in *FloorDestination* (22100), indicating a PAR workstation (ex. W001) to route to on the floor (or "PARO" to rout to the Floor PAR Official of the underlying symbol) if not specified on the inbound message. See Section 'FIX Port Attributes' for information on available port attributes, including *Default FloorRoutingInst* and *Default FloorDestination*.

	Order Tags/P	Handling of the Order			
Order Floor Destination	Order FloorRoutingInst	Port Default Floor Destination	Port Default FloorRoutingInst	Orders Only Executed on Floor (i.e. complex AON)	All Other Order Types
			E (default)	Reject: ineligible for electronic book	Process electronically
			D	Reject: requires a floor destination	Reject: requires a floor destination
			Х	Reject: requires a floor destination	Reject: requires a floor destination
		W001	E (default)	Reject: ineligible for electronic book	Process electronically
		W001	D	Route to floor: W001	Route to floor: W001
		W001	Х	Route to floor: W001	Process electronically
W009			E (default)	Reject: ineligible for electronic book	Process electronically
W009		W001	D	Route to floor: W009	Route to floor: W009
W009			Х	Route to floor: W009	Process electronically
W009	E			Reject: ineligible for electronic book	Process electronically
W009	D			Route to floor: W009	Route to floor: W009
W009	Х			Route to floor: W009	Process electronically
	E			Reject: ineligible for electronic book	Process electronically
	D			Reject: requires a floor destination	Reject: requires a floor destination
	X			Reject: requires a floor destination	Process electronically

E = Electronic only

D = Direct

X = Route to floor if unable to process electronically

1.6.9.1 Floor Representation Restatements (C1 Only)

Orders routed to the trading floor will be represented to the open outcry crowd before being traded in the crowd. The Cboe BOE protocol provides a mechanism for clients to receive restatement of orders at the time of representation.

BOE Floor Representation Restatements are sent to connected clients for each order when the floor broker reports representation of the order to the crowd. Floor Representation Restatements sent to BOE ports will also be sent to connected Order by Order Drop clients having the *Floor Representation Restatements* port attribute enabled.

Order Restated messages for floor representation will have *RestatementReason* = "F" (Represented on Floor). The *TransactTime* (60) will be the recorded time of the representation.

2 Session

2.1 Message Headers

Each message has a ten byte header. The two initial *StartOfMessage* bytes are present to aid in message reassembly for network capture purposes. The *MatchingUnit* field is only populated on sequenced, non-session level messages sent from Cboe to the Member. Messages from Member to Cboe and all session level messages must always set this value to 0.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	Message type.
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
				For session level traffic, the unit is set to 0.
				For messages from Member to Cboe, the unit must be 0.
SequenceNumber	6	4	Binary	The sequence number for this message.
				Messages from Cboe to Member are sequenced distinctly per matching unit.
				Messages from Member to Cboe are sequenced across all matching units with a single sequence stream.
				Member can optionally send a 0 sequence number on all messages from Member to Cboe. Cboe highly recommends that Members send sequence numbers on all inbound messages.

2.2 Login, Replay and Sequencing

Session level messages, both inbound (Member to Cboe) and outbound (Cboe to Member) are unsequenced.

Inbound (Member to Cboe) application messages are sequenced. Upon reconnection, Cboe informs the Member of the last processed sequence number; the Member may choose to resend any messages with sequence numbers greater than this value. A gap forward in the Member's incoming sequence number is permitted at any time and is ignored by Cboe. Gaps backward in sequence number (including the same sequence number used twice) are never permitted and will always result in a Logout message being sent and the connection being dropped.

Most (but not all) outbound (Cboe to Member) application messages are monotonically sequenced per matching unit. Each message's documentation will indicate whether it is sequenced or unsequenced. While matching units on BOE correspond directly to matching units on Multicast PITCH, sequence numbers do not.

Upon reconnection, a Member sends the last received sequence number per matching unit in a Login Request message. Choe will respond with any missed messages. However, when the Login Request NoUnspeciedUnitReplay flag is enabled, Choe will exclude messages from unspecified matching units during replay. Choe will send a Replay Complete message when replay is finished. If there are no messages to replay, a Replay Complete message will be sent immediately after a Login Response message. Choe will reject all orders during replay.

©2019 Cboe Global Markets, Inc.

Assuming a Member has requested replay messages using a properly formatted Login Request after a disconnect, any unacknowledged orders remaining with the Member after the Replay Complete message is received should be assumed to be unknown to Cboe.

Unsequenced messages will not be included during replay.

A session is identified by the username and session sub-identifier (both supplied by Cboe). Only one concurrent connection per username and session sub-identifier is permitted.

If a login is rejected, an appropriate Login Response message will be sent and the connection will be terminated.

2.3 Sequence Reset

A reset sequence operation is not available for Binary Order Entry. However, a Member can send a Login Request message with NoUnspecifiedUnitReplay field enabled, and NumberOfUnits field set to zero. Then, upon receiving a Login Response message from Cboe, the Member can use the field LastReceivedSequenceNumber as the sequence starting point for sending future messages.

2.4 Heartbeats

Client Heartbeat messages are sent from Member to Cboe and Server Heartbeat messages are sent from Cboe to Member if no other data has been sent in that direction for one second. Like other session level messages, heartbeats from Cboe to the Member do not increment the sequence number. If Cboe receives no inbound data or heartbeats for five seconds, a Logout message will be sent and the connection will be terminated. Members are encouraged to have a one second heartbeat interval and to perform similar connection staleness logic.

2.5 Logging Out

To gracefully log out of a session, a Logout Request message should be sent by the Member. Choe will finish sending any queued data for that port and will then respond with its own Logout message and close the connection. After receipt of a Logout Request message, Choe will ignore all other inbound (Member to Choe) messages except for Client Heartheat.

©2019 Cboe Global Markets, Inc.

3 Session Messages

3.1 Member to Cboe

3.1.1 Login Request

A Login Request message must be sent as the first message upon connection.

A number of repeating parameter groups, some of which may be required, are sent at the end of the message. Ordering of parameter groups is not important. New parameter groups may be added in the future with no notice.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x37
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.
SessionSubID	10	4	Alphanumeric	Session Sub ID supplied by Cboe.
Username	14	4	Alphanumeric	Username supplied by Cboe.
Password	18	10	Alphanumeric	Password supplied by Cboe.
NumberOfParam Groups	28	1	Binary	A number, n (possibly 0), of parameter groups to follow.
ParamGroup₁				First parameter group.
ParamGroup₁				Last parameter group.

Unit Sequences Parameter Group

This parameter group includes the last consumed sequence number per matching unit received by the Member. Cboe uses these sequence numbers to determine what outbound (Cboe to Member) traffic, if any, was missed by the Member. If this parameter group is not sent, it's assumed the Member has not received any messages (e.g., start of day).

The Member does not need to include a sequence number for a unit if they have never received messages from it. For example, if the Member has received responses from units 1, 3, and 4, the Login Request message need not include unit 2. If the Member wishes to send a value for unit 2 anyway, 0 would be the only allowed value.

Only one instance of this parameter group may be included.

Field	Offset	Length	Data Type	Description
ParamGroupLength	0	2	Binary	Number of bytes for the parameter group, including this field.
ParamGroupType	2	1	Binary	0x80
NoUnspecified UnitReplay	3	1	Binary	Flag indicating whether to replay missed outgoing (Cboe to Member) messages for unspecified units. $0 \times 00 = \text{False}$ (Replay Unspecified Units) $0 \times 01 = \text{True}$ (Suppress Unspecified Units Replay)

©2019 Cboe Global Markets, Inc.

NumberOfUnits	4	1	Binary	A number, n (possibly 0), of unit/sequence pairs to follow, one per unit from which the Member has received messages.
UnitNumber 1		1	Binary	A unit number.
UnitSequence ₁		4	Binary	Last received sequence number for the unit.
UnitNumber n		1	Binary	A unit number.
UnitSequence _n		4	Binary	Last received sequence number for the unit.

Return Bitfields Parameter Group

This parameter group, which may be repeated, indicates which attributes of a message will be returned by Cboe for the remainder of the session. This allows Members to tailor the echoed results to the needs of their system without paying for bandwidth or processing they do not need.

Listing of the return bitfields which are permitted per message is contained in 'Section 7 – Return Bitfields per Message'.

Field	Offset	Length	Data Type	Description
ParamGroupLength	0	2	Binary	Number of bytes for the parameter group, including this field.
ParamGroupType	2	1	Binary	0x81
MessageType	3	1	Binary	Return message type for which the bitfields are being specified (e.g., 0x25 for an Order Acknowledgment message).
NumberOfReturn Bitfields	4	1	Binary	Number of bitfields to follow.
ReturnBitfield ₁	5	1	Binary	Bitfield identifying fields to return.
ReturnBitfield _n		1	Binary	Last bit field.

©2019 Choe Global Markets, Inc.

Example Login Request Message:

Note this example is for illustrative purposes only. Actual login messages will contain specification of return bitfields for a larger set messages and each return bitfield specification will be complete whereas the example below is only an illustration for purposes of demonstrating the construction of the Login Request message.

Field Name	Hex	kade	cim	al							Notes
StartOfMessage	BA	ВА									Start of message bytes.
MessageLength		00									61 bytes
MessageType	37										Login Request
MatchingUnit	00										Always 0 for inbound messages
SequenceNumber	00	00	00	00							Always 0 for session level messages
SessionSubID	30	30	30	31							0001
Username	54	45	53	54							TEST
Password	54	45	53	54	49	4E	47	00	00	00	TESTING
NumberOfParam	03										3 parameter groups
Groups											
ParamGroupLength	ΟE	00									15 bytes for this parameter group
ParamGroupType	80										0x80 = Unit Sequences
NoUnspecified	01										True (replay only specified units)
UnitReplay											
NumberOfUnits	02										Two unit/sequence pairs to follow;
$UnitNumber_1$	01										Unit 1
UnitSequence ₁	4A	ВВ	01	00							Last received sequence of 113,482
UnitNumber 2	02										Unit 2
<i>UnitSequence</i> ₂	00	00	00	00							Last received sequence of 0
ParamGroupLength	08	00									8 bytes for this parameter group
ParamGroupType	81										0x81 = Return Bitfields
MessageType	25										0x25 = Order Acknowledgment
NumberOfReturn	03										3 bitfields to follow
Bitfields											
$ReturnBitfield_1$	00										No bitfields from byte 1
$ReturnBitfield_2$	41										Symbol, Capacity
ReturnBitfield₃	05										Account, ClearingAccount
ParamGroupLength	0B	00									11 bytes for this parameter group
ParamGroupType	81										0x81 = Return Bitfields
MessageType	2C										0x2C = Order Execution
NumberOfReturn	06										6 bitfields to follow
Bitfields											
$ReturnBitfield_1$	00										No bitfields from byte 1
$ReturnBitfield_2$	41										Symbol, Capacity
ReturnBitfield₃	07										Account, ClearingFirm, ClearingAccount
$ReturnBitfield_4$	00										No bitfields from byte 4
ReturnBitfield₅	40										BaseLiquidityIndicator
$ReturnBitfield_6$	00										No bitfields from byte 6

©2019 Cboe Global Markets, Inc.

3.1.2 Logout Request

To end the session, the Member should send a Logout Request message. Choe will finish sending any queued data and finally respond with a Logout message and close the connection.

A Member may simply close the connection without logging out, but may lose any queued messages by doing so.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x02
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.

Example Logout Request Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	08 00	8 bytes
MessageType	02	Logout Request
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	00 00 00 00	Always 0 for session level messages

3.1.3 Client Heartbeat

See 'Section 2.4 – Heartbeats' for more information about heartbeats and the session level protocol.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x03
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.

Example Client Heartbeat Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	08 00	8 bytes
MessageType	03	Client Heartbeat
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	00 00 00 00	Always 0 for session level messages

©2019 Cboe Global Markets, Inc.

3.2 Cboe to Member

3.2.1 Login Response

A Login Response message is sent in response to a Login Request message. On a successful login, the LoginResponseStatus will be set to 'A'. On a failed login, LoginResponseStatus will be set to a value other than 'A', and LoginResponseText will be set to an appropriate failure description.

Choe will verify Return Bitfields at login time. If the Return Bitfields in a Return Bitfields Parameter Group are invalid, *LoginResponseStatus* will be set to F, and *LoginResponseText* will include a description of which byte and bit are invalid. This is done to ensure that reserved fields are not used, and only options that apply to the local market are set. See 'Section 6 – Return Bitfields Per Message' for additional information.

Note that two sets of sequence numbers are available on the Login Response. The set of sequence numbers in the body are the actual Cboe to Member sequence numbers indicating the highest sequence numbers available per matching unit. If specified during login, the Unit Sequences Parameter Group will be returned as an echo of the sequence numbers the Member presented during login as the highest received. If the sequence numbers are different, the gap will be filled by Cboe during the replay. A subset of units can be provided in the Login Request; however, all units will be provided in the Login Response.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x24
MatchingUnit	5	1	Binary	Always 0 for session level messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.
LoginResponseStatus	10	1	Alphanumeric	Accepted, or the reason for the rejection. A = Login Accepted N = Not authorized (invalid username/password) D = Session is disabled B = Session in use S = Invalid session Q = Sequence ahead in Login message I = Invalid unit given in Login message F = Invalid return bit field in login message M = Invalid Login Request message structure
LoginResponseText	11	60	Text	Human-readable text with additional information about the reason for rejection. ASCII NUL (0x00) filled on the right, if necessary.
NoUnspecified UnitReplay	71	1	Binary	Echoed back from the original Login Request message.
LastReceived SequenceNumber	72	4	Binary	Last inbound (Member to Cboe) message sequence number processed by Cboe.
NumberOfUnits	76	1	Binary	A number, n, of unit/sequence pairs to follow, one per unit. A pair for every unit will be sent, even if no messages have been sent to this port today. For unsuccessful logins, this will be 0.
UnitNumber 1		1	Binary	A unit number.
UnitSequence ₁		4	Binary	Highest available Cboe to Member sequence number for the unit.
UnitNumber n		1	Binary	A unit number.

©2019 Cboe Global Markets, Inc.

UnitSequence _n	4	Binary	Highest available Cboe to Member sequence number for the unit.
NumberOfParam Groups	1	Binary	Echoed back from the original Login Request message.
ParamGroup₁			Echoed back from the original Login Request message.
ParamGroup₁			Echoed back from the original Login Request message.

Example Login Response Message:

Field Name		xade	ecim	al							Notes
StartOfMessage	BA	ВА									Start of message bytes.
MessageLength	88	00									136 bytes
MessageType	24										Login Response
MatchingUnit	00										Always 0 for session messages
SequenceNumber	00	00	00	00							Always 0 for session level messages
LoginResponseStatus	41										A = Login Accepted
LoginResponseText	41	63	63	65	70	74	65	64	00	00	Accepted
	00	00	00	00	00	00	00	00	00	00	(padding)
	00	00	00	00	00	00	00	00	00	00	(padding)
	00	00	00	00	00	00	00	00	00	00	(padding)
	00	00	00	00	00	00	00	00	00	00	(padding)
	00	00	00	00	00	00	00	00	00	00	(padding)
NoUnspecified	01										True (replay only specified units)
UnitReplay											
Last Received	54	4A	02	00							Last sequence Cboe received of 150,100
Sequence Number											
NumberOfUnits	04										Four unit/sequence pairs to follow;
UnitNumber 1	01										Unit 1
UnitSequence ₁	4A	ВВ	01	00							Actual last sequence of 113,482
UnitNumber 2	02										Unit 2
UnitSequence2	00	00	00	00							Actual last sequence of 0
UnitNumber 3	02										Unit 3
UnitSequence3	00	00	00	00							Actual last sequence of 0
UnitNumber 4	02										Unit 4
UnitSequence4		A1	00	00							Actual last sequence of 41,337
NumberOfParam Groups	03										3 parameter groups
ParamGroupLength	14	00									20 bytes for this parameter group
ParamGroupType	80										0x80 = Unit Sequences
NoUnspecified	01										True (replay unspecified units)
UnitReplay											
NumberOfUnits	03										Three unit/sequence pairs to follow;
UnitNumber 1	01										Unit 1
UnitSequence ₁	4 A	ВВ	01	0.0							Last received sequence of 113,482
UnitNumber 2	02										Unit 2
UnitSequence2	0.0	00	00	00							Last received sequence of 0
UnitNumber 3	04										Unit 4
UnitSequence3		A1	00	00							Last received sequence of 41,337
ParamGroupLength	08										8 bytes for this parameter group
ParamGroupType	81										0x81 = Return Bitfields

©2019 Cboe Global Markets, Inc.

MessageType	25	<pre>0x25 = Order Acknowledgment</pre>
NumberOfReturn	03	3 bitfields to follow
Bitfields		
ReturnBitfield ₁	00	No bitfields from byte 1
ReturnBitfield2	41	Symbol, Capacity
ReturnBitfield3	05	Account, ClearingAccount
ParamGroupLength	0C 00	12 bytes for this parameter group
ParamGroupType	81	0x81 = Return Bitfields
MessageType	2C	0x2C = Order Execution
NumberOfReturn	07	7 bitfields to follow
Bitfields		
ReturnBitfield1	00	No bitfields from byte 1
ReturnBitfield2	41	Symbol, Capacity
ReturnBitfield3	07	Account, ClearingFirm, ClearingAccount
ReturnBitfield4	00	No bitfields from byte 4
ReturnBitfield5	40	BaseLiquidityIndicator
ReturnBitfield6	00	No bitfields from byte 6
ReturnBitfield7	01	SubLiquidityIndicator

3.2.2 Logout

A Logout is usually sent in response to a Logout Request. Any queued data is transmitted, a Logout is sent, and Cboe will close the connection. However, a Logout may also be sent if the Member violates the protocol specification (e.g., by moving backwards in sequence number).

The Logout contains the last transmitted sequence number for each unit, allowing the Member to check that their last received sequence number matches.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x08
MatchingUnit	5	1	Binary	Always 0 for session level messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.
LogoutReason	10	1	Alphanumeric	The reason why the Logout message was sent. U = User Requested E = End of Day A = Administrative ! = Protocol Violation
LogoutReasonText	11	60	Text	Human-readable text with additional information about the reason for logout. Particularly useful if LogoutReason = ! (Protocol Violation).
LastReceived SequenceNumber	71	4	Binary	Last inbound (Member to Cboe) message sequence number processed by Cboe.
NumberOfUnits	75	1	Binary	A number, <i>n</i> (possibly 0), of unit/sequence pairs to follow, one per unit from which the client has received messages.
UnitNumber 1		1	Binary	A unit number.
UnitSequence ₁		4	Binary	Highest available sequence number for the unit.
UnitNumber n		1	Binary	A unit number.
UnitSequence₁		4	Binary	Highest available sequence number for the unit.

©2019 Cboe Global Markets, Inc.

Example Logout Response Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	55 00	85 bytes
MessageType	08	Logout
MatchingUnit	00	Always 0 for session level messages
SequenceNumber	00 00 00 00	Always 0 for session level messages
LogoutReason	55	U = User Requested
LogoutReasonText	55 73 65 72 00 00 00 00	00 00 User
	00 00 00 00 00 00 00 00	00 00
	00 00 00 00 00 00 00 00	00 00
	00 00 00 00 00 00 00 00	00 00
	00 00 00 00 00 00 00 00	00 00
	00 00 00 00 00 00 00 00	00 00
LastReceived	54 5A 02 00	Last Cboe received sequence of 150,100
SequenceNumber		
NumberOfUnits	02	Two unit/sequence pairs to follow;
UnitNumber 1	01	Unit 1
$UnitSequence_1$	4A BB 01 00	Last sent sequence of 113,482
UnitNumber 2	02	Unit 2
UnitSequence ₂	00 00 00 00	Last sent sequence of 0

3.2.3 Server Heartbeat

See 'Section 2.4 – Heartbeats' for more information about heartbeats and the session level protocol.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x09
MatchingUnit	5	1	Binary	Always 0 for session level messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.

Example Server Heartbeat Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	08 00	8 bytes
MessageType	09	Server Heartbeat
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	00 00 00 00	Always 0 for session level messages

 $\hbox{@2019 Cboe Global Markets, Inc.}\\$

3.2.4 Replay Complete

See 'Section 2.2 – Login, Replay and Sequencing' for more information on Login, sequencing and replay.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x13
MatchingUnit	5	1	Binary	Always 0 for session level messages.
SequenceNumber	6	4	Binary	Always 0 for session level messages.

Example Replay Complete Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	08 00	8 bytes
MessageType	13	Replay Complete
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	00 00 00 00	Always 0 for session level messages

4 Application Messages

4.1 Member to Cboe

4.1.1 New Order

A New Order message consists of a number of required fields followed by a number of optional fields. The optional fields used are specified by setting bits in the *NewOrderBitfields*. Fields must be appended at the end of the message, starting with the lowest order enabled bit in the first bit field first.

Permitted input optional fields are described in 'Section 5.1 – New Order'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x38
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
ClOrdID	10	20	Text	Corresponds to ClOrdID (11) in Cboe FIX.
				ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
				If the CIOrdID matches a live order, the order will be rejected as duplicate.
				Note: Cboe only enforces uniqueness of ClOrdID values among currently live orders, which includes long-lived, persisting GTC/GTD orders. However, we strongly recommend that you keep your ClOrdID values unique.
Side	30	1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX. 1 = Buy 2 = Sell
OrderQty	31	4	Binary	Corresponds to <i>OrderQty</i> (38) in Cboe FIX.
NumberOf NewOrder Bitfields	35	1	Binary	Order quantity. System limit is 999,999 contracts. Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
NewOrderBitfield ¹	36	1	Binary	Bitfield identifying fields to follow.
NewOrderBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Required Order Attributes:

The following are required to be sent on new orders:

- Some form of symbology (see **Symbology** below);
- Price (limit orders) or Price and/or OrdType (limit order market orders); and,
- Capacity;

©2019 Cboe Global Markets, Inc.

All price fields (*Price, StopPx*) must be entered as non-negative values.

All other values have defaults. See the table in **List of Options Fields** for additional information about each optional field, including its default value.

Symbology:

For additional information, refer to the Cboe US Equity and Options Symbology Reference.

Example New Order Message:

Field Name StartOfMessage MessageLength MessageType MatchingUnit SequenceNumber ClOrdID	Hexadecimal BA BA 59 00 38 00 64 00 00 00 41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00	Notes Start of message bytes. 89 bytes New Order Always 0 for inbound messages Sequence number 100 ABC123
Side OrderQty NumberOfNewOrder Bitfields NewOrderBitfield1 NewOrderBitfield2 NewOrderBitfield3 NewOrderBitfield4	31 64 00 00 00 04 04 C1 01	Buy 100 contracts Four bitfields to follow Price Symbol, Capacity, RoutingInst Account MaturityDate, StrikePrice, PutOrCall, OpenClose
Price Symbol Capacity RoutingInst Account MaturityDate StrikePrice PutOrCall OpenClose	70 17 00 00 00 00 00 00 00 40 53 46 54 00 00 00 00 00 43 52 00 00 00 00 00 00 00 00 00 00 00 00 00	0.60 MSFT C = Customer R = Routable DEFG 2011-03-19 17.50 1 = Call O = Open

4.1.2 New Order Cross (C1 and EDGX Only)

A New Order Cross message contains the details for both the agency (initiating) and contra side(s) of a cross order (such as an AIM order). The message consists of a number of required fields including *Symbol*, *Price*, *OrderQty*, and relevant clearing information for all parties, as well as a number of optional fields.

The first order in the list is the agency order, while the rest are contra side responses. There is a maximum of ten (10) contra-parties that can be supplied with the order, for a total of eleven (11) repeating groups, as described below.

In each repeating group, the *Side*, *AllocQty*, *ClOrdID*, *Capacity*, *OpenClose*, and *ClearingFirm* are always required. Beyond that, the bits in the *NewOrderCrossBitfields* control which fields are expected. Any fields that are specified in *NewOrderCrossBitfields* that appear in the repeating groups should not be supplied in the optional fields that come after the repeating groups.

©2019 Choe Global Markets, Inc.

Permitted input optional fields are described in 'Section 5.2 – New Order Cross'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x41
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
CrossID	10	20	Text	Corresponds to CrossID (548) in Cboe FIX.
				Day-unique identifier for the cross order chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
CrossType	30	1	Alphanumeric	Corresponds to <i>CrossType</i> (549) in Cboe FIX.
				Type of auction order being submitted. This indicates the type of auction that will be initiated upon order entry.
				1 = Automated Improvement Mechanism ("AIM") 2 = Qualified Contingent Cross ("QCC") 3 = Solicitation Cross ("SAM") (C1 only) Effective on EDGX TBD
CrossPrioritization	31	1	Alphanumeric	Corresponds to <i>CrossPrioritization</i> (550) in Cboe FIX.
				Indicates which side of the cross order will be pri- oritized for execution. This identifies the Agency side.
				1 = Buy 2 = Sell
Price	32	8	Binary Price Corresponds to <i>Price</i> (44) in Cboe FIX.

4.1.3 New Complex Order (C1, EDGX and C2 Only)

A New Complex Order message contains the details required to enter an order on a complex instrument created with previously entered New Complex Instrument request. The message is similar to a New Order with an additional repeating group of the positions for each leg. The positions must be in the order returned by the system in the Complex Instrument Accepted response message, not the order supplied in the New Complex Instrument request. Complex orders in cross product spreads (ie SPX/SPXW, IWM/RUT, DIA/DJX, VIX/VXX, MNX/NDX) where the products do not operate on the same matching unit cannot leg into the simple book.

Permitted input optional fields are described in 'Section 5.3 – New Complex Order'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x4B
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
ClOrdID	10	20	Text	Corresponds to ClOrdID (11) in Cboe FIX.
				ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
				If the ClOrdID matches a live order, the order will be rejected as duplicate.
				Note: Cboe only enforces uniqueness of ClOrdID values among currently live orders, which includes long-lived, persisting GTC/GTD orders. However, we strongly recommend that you keep your ClOrdID values unique.
Side	30	1	Alphanumeric	Corresponds to Side (54) in Cboe FIX.
				1 = Buy 2 = Sell
OrderQty	31	4	Binary	Corresponds to OrderQty (38) in Cboe FIX.
				Order quantity. System limit is 999,999 contracts.
NumberOf NewComplexOrder Bitfields	35	1	Binary	Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
NewComplexOrder Bitfield¹	36	1	Binary	Bitfield identifying fields to follow.
NewComplexOrder Bitfield ⁿ		1	Binary	Last bitfield.
NoLegs		1	Binary	Corresponds to <i>NoLegs</i> (555) in Cboe FIX.

©2019 Cboe Global Markets, Inc.

	00 00 00 00 00	

4.1.4 New Order Cross Multileg (C1 and EDGX Only)

A New Order Cross Multileg message contains the details for both the agency (initiating) and contra side(s) of a cross order (such as an AIM order). The two-sided order consists of a number of required fields including *Symbol*, *Price*, *OrderQty*, and relevant clearing information for both the agency and contra sides, as well as a number of optional fields. A maximum of ten (10) contra-parties will be accepted per order.

Cross Order Acknowledgement, Cross Order Rejected, and Cross Order Cancelled message types will be used by the Exchange to respond to New Order Cross Multileg messages.

Permitted input optional fields are described in 'Section 5.4 – New Order Cross Multileg'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x5A
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
CrossID	10	20	Text	Corresponds to CrossID (548) in Cboe FIX.
				Day-unique identifier for the cross order chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
CrossType	30	1	Alphanumeric	Corresponds to <i>CrossType</i> (549) in Cboe FIX.
				Type of auction order being submitted. This indicates the type of auction that will be initiated upon order entry.
				1 = Automated Improvement Mechanism ("AIM") (C1 only) Effective on EDGX TBD 2 = Qualified Contingent Cross ("QCC") 3 = Solicitation Cross ("SAM") (C1 only)
CrossPrioritization	31	1	Alphanumeric	Corresponds to <i>CrossPrioritization</i> (550) in Cboe FIX.
				Indicates which side of the cross multileg order will be prioritized for execution. This identifies the Agency side.
				1 = Buy 2 = Sell
Price	32	8	Binary Price	Corresponds to <i>Price</i> (44) in Cboe FIX.
				Auction Price.

4.1.5 Cancel Order

Request to cancel either a single order or mass cancellation of a group of orders. Note that this does not apply to open orders across multiple sessions.

A single order cancellation references the *ClOrdID* from a previous order (*OrigClOrdID* field). An Order Cancel Request message cannot be used to cancel a single quote, referencing a previous *OrderID* from a quote will be rejected.

©2019 Cboe Global Markets, Inc.

Order Cancel Request messages for GTC and GTD orders may continue to be issued anytime after the trading session ends at 4:00 PM ET (4:15 PM ET for select ETF's) and prior to the trading session disconnecting at 4:45 PM ET. All other order message types received after the market closes at 4:00 PM ET (4:15 PM ET for select ETF's) will be rejected.

Mass cancellation of a group of orders can be done with one of two methods, using either the MassCancel (legacy) or MassCancelInst optional fields. If both optional fields MassCancel and MassCancelInst are specified, the Cancel Order request will be rejected. Members are encouraged to use the MassCancelInst method as the legacy MassCancel method will be deprecated in the future with notice.

Legacy Mass Cancel method:

- Populate the MassCancel required field (and do not specify the MassCancelInst optional field)
- Specify the ClearingFirm field, optionally the RiskRoot field, and optionally MassCancelld if a single Mass Cancel Acknowledgement is requested.
- Specify the MassCancelLockout optional field to request subsequent rejection of new orders based on the level of MassCancel (i.e. Firm level, Risk Root level, or Custom Group Id level)

MassCancelInst method

- Specify the MassCancelInst optional field
- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelld* if the Acknowledgement Style is set to S or B
- Risk lockout is optionally specified using the *MassCancelInst* field. As a result, the *MassCancelLockout* field will be ignored when *MassCancelInst* is present.

When specifying the RiskRoot field, using the underlying symbol is strongly recommended. Mass cancellations are always performed at the risk root (underlying) level.

The system limits the rate at which identical Mass Cancel requests can be submitted to the system. Requests are restricted to twenty (20) messages per second per port.

An identical Mass Cancel message is defined as a message having all of the same *CustomGroupID*, *Symbol*, *Clearing Firm*, *Lockout Instruction*, *Instrument Type Filter* and *GTC Order Filter* field values, as a previously received message. Permitted input optional fields are described in 'Section 5.4 – Cancel Order'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field
				but not including the two bytes for the
				StartOfMessage field.
MessageType	4	1	Binary	0x39
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
OrigClOrdID	10	20	Text	Corresponds to OrigClOrdID (41) in Cboe FIX. ClOrdID
				of the order to cancel. For mass cancel requests,
				must be empty (all zeroes).
NumberOf	30	1	Binary	Bitfield identifying bitfields which are set. May be 0.
CancelOrder				Field values must be appended to the end of the
Bitfields				message.
CancelOrder	31	1	Binary	Bitfield identifying fields to follow. Only present if
Bitfield ¹				NumberOfCancelOrderBitfields is non-zero.
CancelOrder		1	Binary	Last bitfield.

											S = Single ack
											L = Lockout symbol MSFT
											B = Cancel simple and complex

4.1.6 Modify Order

Request to modify an order. The order attributes to be modified are selected using *NumberOfModifyBitfields* and some number of bitfields to follow. *Price, OrderQty, OrdType, MaxFloor* (BZX, C1, and C2 only), *FrequentTraderID* (C1 only), and *StopPx* may be adjusted. Modifies will result in a loss of time priority unless the modification involves a decrease in *OrderQty*, or a change to *MaxFloor*, *FrequentTraderID*, or *StopPx*. *OrdType* may be adjusted from Limit to Market.

Changes in *OrderQty* result in an adjustment of the current order's *OrderQty*. The new *OrderQty* does not directly replace the current order's *LeavesQty*. Rather, a delta is computed from the current *OrderQty* and the replacement *OrderQty*. This delta is then applied to the current *LeavesQty*. If the resulting *LeavesQty* is less than or equal to zero, ©2019 Cboe Global Markets, Inc.

the order is cancelled. This results in safer behavior when the modification request overlaps partial fills for the current order, leaving the Member in total control of the share exposure of the order.

A Modify Order should not be issued until the Order Acknowledgement for the previous New Order or Order Modified message for the previous Modify Order has been received. The BOE handler will reject a new Modify Order if it has not been accepted or it has not seen the result of the prior modification from the Matching Engine. However, Modify Order requests that merely reduce OrderQty may be overlapped if the existing ClOrdID is reused, as long as the trading identifier has not been opted-in to daily limit trading risk controls. This is the only case where reuse of the ClOrdID is allowed.

The OrderQty and Price fields in the optional field block must be present on all Modify Order requests. Messages sent without OrderQty or Price fields will be rejected.

Permitted input optional fields are described in 'Section 5.5 – Modify Order'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x3A
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
ClOrdID	10	20	Text	New ClOrdID for this order.
OrigClOrdID	30	20	Text	Corresponds to OrigClOrdID (41) in Cboe FIX. ClOrdID of the order to replace. In the case of multiple changes to a single order, this will be the ClOrdID of the most recently accepted change.
NumberOf ModifyOrder Bitfields	50	1	Binary	Bitfield identifying bitfields which are set. May be 0. Field values must be appended to the end of the message.
ModifyOrder Bitfield ¹	51	1	Binary	Bitfield identifying fields to follow.
ModifyOrder Bitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example Modify Order Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes
MessageLength	3E 00	82 bytes
MessageType	3A	Modify Order
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	64 00 00 00	Sequence Number 100
ClOrdID	41 42 43 31 32 34 00 00 00 00 00 00 00 00 00 00 00 00 00	ABC124
OrigClOrdID	41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00	ABC123
NumberOfModify OrderBitfields	01	One bitfield to follow
ModifyOrderBitfield1	0C	OrderQty, Price

4.1.7 Quote Update

Request to enter or update one or more quotes. Quote Update requests will be forwarded in their entirety to the matching engine instance as a single message and will be applied in a single transaction. Optional bitfields are not supported for any response messages for quotes.

All options in a single Quote Update must trade under a single risk root. Requests which include options trading under multiple risk roots will be rejected in their entirety.

A quote is unique per port, EFID, and side. You may quote multiple price levels of depth using either multiple EFIDs on a single port or with the same EFID on multiple ports.

Quote requests are one-sided. To delete a quote, send an update with a zero price and size.

Quotes may utilize simple options only; complex options quotes may not be submitted.

All quotes will be automatically cancelled at the end of the trading day.

Quotes may be marked post only. If a quote would be displayed at a price that locks or crosses the NBBO, it will be rejected.

On BZX Options only, quote prices at non-displayable increments are permitted. Prices will be adjusted to the most aggressive non-locking price. Quotes may work (but not display) to lock an away market. Once posted, quotes act as a Display Price Sliding order. C2 and EDGX quotes act as Price Adjust orders. A quote can be sent at a price that locks the NBBO, but will be rejected if the price crosses the NBBO or the displayed Cboe book.

If a quote modification is rejected, the resting quote being modified is also cancelled.

Executions, unsolicited cancels, and unsolicited modification response messages from the exchange are different from those for orders. They are optimized for efficiency and contain some different data elements (e.g., *QuoteUpdateID*) than the respective messages for orders.

The *PreventMatch* field may not be specified on the Quote Update message and Match Trade Prevention is only available if defaulted at the port level. For Bulk Quoting ports, only Cancel Newest, Cancel Oldest, or Cancel Both are permitted. If a Bulk Quoting port is not configured with both a default MTP Modifier and Unique ID Level, Match Trade Prevention will be disabled.

Capacity may not be changed when modifying a quote. To change Capacity of a resting quote, you must first send a quote with zero price and size and then re-enter the quote with the desired Capacity.

The Quote Execution message will be the only Quote related message available over ODROP and FIXDROP.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x55
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
QuoteUpdateID	10	16	Text	ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
				Responses, both to the Quote Update and any Quote Executions, Quote Cancellations, and Quote Modification messages will include this identifier.
				Note: Cboe only enforces uniqueness of QuoteUpdateID values among those not yet acknowledged by the ME. However, we strongly

©2019 Cboe Global Markets, Inc.

				recommend that you keep your <i>QuoteUpdateID</i> values unique for a trading day.
ClearingFirm	26	4	Alpha	EFID that will clear the trade. If left blank, the port attribute value of 'Default EFID' is used.
ClearingAccount	30	4	Alpha	Corresponds to OnBehalfOfSubID (116) and ClearingAccount (440) in Cboe FIX.
				See List of Optional Fields for additional information.
CMTANumber	34	4	Binary	Corresponds to CMTANumber (439) in Cboe FIX.
				See List of Optional Fields for additional information.
Account	38	16	Text	Corresponds to Account (1) in Cboe FIX.
				See List of Optional Fields for additional information.
CustomGroupID	54	2	Binary	Optional. Used to group orders for use in Purge Orders. Set to 0 if functionality not needed.
Capacity	56	1	Alpha	Corresponds to <i>OrderCapacity</i> (47) in Cboe FIX.
				See List of Optional Fields for additional information.
Reserved	57	15	Binary	Reserved for future expansion. To maintain forward compatibility, fill with 0.
SendTime	72	8	DateTime	Optional, may be filled with binary zero (0×00).
				Market Makers desiring the Exchange to report quote events to the CAT under the Options Market Maker Quote Exemption must populate this field with the quote send time with at least millisecond granularity. Market Makers that do not populate this field will be required to report their quotes to CAT.
PostingInstruction	80	1	Text	P = Post Only (do not remove liquidity) B = Book Only (allow removal of liquidity, available for Market Makers only) N = Book Only, No Slide R = Post Only, No Slide (do not remove liquidity)
SessionEligibility	81	1	Text	A = Participates in both Global and Regular Trading Hours (C1, C2, and EDGX only) R = Regular Trading Hours (RTH) only
QuoteCnt	82	1	Binary	Number of repeating groups included in this quote update. Allowed values are 1-20.
Repeating Groups of				
Symbol		6	Alphanumeric	Cboe native identifier
Side		1	Text	1 = Buy 2 = Sell
OpenClose		1	Text	Corresponds to OpenClose (77) in Cboe FIX.

4.1.8 Quote Update (Short)

A shorter version of Quote Update which restricts the information which can be presented. Uses less bandwidth than the Quote Update message but messages presented to the Matching Engine are identical between both Quote Update and Quote Update (Short) messages.

Quote Update (Short) does not allow sending Account but a default for this field may be set at the port level. CMTANumber may never be included on a Quote Update (Short) message.

This message uses a smaller format *Price* and *OrderQty* on each quote update.

All other comments concerning Quote Update in the previous section apply to Quote Update (Short) equally.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x59

©2019 Cboe Global Markets, Inc.

MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
QuoteUpdateID	10	16	Text	ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
				Responses, both to the Quote Update and any Quote Executions, Quote Cancellations, and Quote Modification messages will include this identifier.
				Note: Cboe only enforces uniqueness of QuoteUpdateID values among those not yet acknowledged by the ME. However, we strongly recommend that you keep your QuoteUpdateID values unique for a trading day.
ClearingFirm	26	4	Alpha	EFID that will clear the trade. If left blank, the port attribute value of 'Default EFID' is used.
ClearingAccount	30	4	Alpha	Corresponds to OnBehalfOfSubID (116) and ClearingAccount (440) in Cboe FIX.
				See List of Optional Fields for additional information.
CustomGroupID	34	2	Binary	Optional. Used to group orders for use in Purge Orders. Set to 0 if functionality not needed.
Capacity	36	1	Alpha	Corresponds to OrderCapacity (47) in Cboe FIX.
				See List of Optional Fields for additional information.

Price	AC 07 01 00	6.75
OrderQty	F4 01	500 contracts
Reserved	00 00	Reserved

4.1.9 Purge Orders

Request to cancel a group of orders across all the firm's sessions. This differs from a mass cancel request sent via a Cancel Order message as the purge request is applied across all of the firm's sessions, not just the session on which the Cancel Order was received.

A purge requires populating the *MassCancel* required field (legacy) or specifying the *MassCancelInst* optional field. If the *MassCancelInst* optional field is specified, the *MassCancel* required field will be ignored. Members are encouraged to use the *MassCancelInst* method as the legacy *MassCancel* method will be deprecated in the future with notice.

In addition, the Purge Orders message accepts a list of up to 10 *CustomGroupID* values as part of the order matching filter. If both *RiskRoot* and a list of *CustomGroupID* values are specified, the Purge Orders request will be rejected.

Legacy Mass Cancel method:

• Populate the MassCancel required field (and do not specify the MassCancelInst optional field)

©2019 Cboe Global Markets, Inc.

- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelld* if a single Mass Cancel Acknowledgement is requested.
- Specify the MassCancelLockout optional field to request subsequent rejection of new orders based on the level of MassCancel (i.e. Firm level, Risk Root level, or Custom Group Id level)

MassCancelInst method

- Specify the MassCancelInst optional field
- Specify the *ClearingFirm* field, optionally the *RiskRoot* field, and optionally *MassCancelld* if the Acknowledgement Style is set to S or B.
- Risk lockout is optionally specified using the *MassCancelInst* field. As a result, the *MassCancelLockout* field will be ignored when *MassCancelInst* is present.

When specifying the RiskRoot field, using the underlying symbol is strongly recommended. Mass cancellations are always performed at the risk root (underlying) level.

The system limits the rate at which identical Purge Orders requests can be submitted to the system. Requests are restricted to twenty (20) messages per second per port.

An identical Mass Cancel message is defined as a message having all of the same *CustomGroupID*, *Symbol*, *Clearing Firm*, *Lockout Instruction*, *Instrument Type Filter* and *GTC Order Filter* field values, as a previously received message. Permitted input optional fields are described in 'Section 5.7 – Purge Orders'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field
				but not including the two bytes for the
				StartOfMessage field.
MessageType	4	1	Binary	0x47
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
MassCancel	10	1	Alphanumeric	Corresponds to MassCancel (7693) in Cboe FIX.
				Indicates that a mass cancellation is being performed.
NumberOf	11	1	Binary	Bitfield identifying bitfields which are set. May be 0.
PurgeOrders				Field values must be appended to the end of the
Bitfields				message.
PurgeOrderBitfield ¹	12	1	Binary	Bitfield identifying fields to follow. Only present if
				NumberOfPurgeOrdersBitfields is non-zero.
CustomGroupIDCnt	13	1	Binary	Number of repeating CustomGroupID included in this
				message.
CustomGroupID ¹		2	Binary	First CustomGroupID. Only present if
				CustomGroupIDCnt is non-zero.
CustomGroupID ⁿ		2	Binary	Last CustomGroupID.
Optional fields

ClearingFirm	54 45 53	54		TEST
MassCancelInst		42 00 00 00	00 00 00	F = Cancel orders matching clearing firm
	00 00 00	00 00 00		TEST
				S = Single ack
				N = No lockout
				B = Cancel simple and complex
RiskRoot	41 42 43	00 00 00		ABC
MassCancelID	41 42 43	31 32 33 00	00 00 00	ABC123
	00 00 00	00 00 00 00	00 00 00	

4.1.10 Reset Risk

Reset or release Firm, Risk Root, or Custom Group ID level lockout conditions resulting from risk profile trips or self-imposed lockouts issued via Cancel Order or Purge Orders messages. Risk resets can be performed using this message or by using the *RiskReset* field on a New Order message.

When specifying the RiskRoot field, using the underlying symbol is strongly recommended. Risk Resets are always performed at the risk root (underlying) level.

Only one unique risk reset of a given type (EFID Group, EFID, Risk Root, CustomGroupID) is allowed per second. Additional resets will be ignored (*RiskResetResult* = <space>). For example, a customer may reset risk for *CustomGroupID* = 1 and may not reset risk again for *CustomGroupID* = 1 until one second has elapsed. This restriction is designed to safeguard the trading platform from excessive risk messaging.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.

©2019 Cboe Global Markets, Inc.

MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x56
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
RiskStatusID	10	16	Text	Unique identifier for this Reset Risk request. Response message will have this corresponding identifier.
				Note: Cboe only enforces uniqueness of RiskStatusID values among currently unacknowledged requests. However, we strongly recommend that you keep your RiskStatusID values day-unique.
RiskReset	26	8	Text	Corresponds to <i>RiskReset</i> (7692) in Cboe FIX. Indicates Risk Root, Firm, or CustomGroupID lockout reset. See List of Optional Fields for allowed values.
Reserved	34	4	Binary	Reserved for future expansion. To maintain forward compatibility, fill with 0.
ClearingFirm	38	4	Alpha	Risk will be reset for this EFID.
RiskRoot	42	6	Alphanumeric	Populate with Risk Root for resets at the Risk Root level.
				Leave empty for resets at the firm level.
CustomGroupID	48	2	Binary	Populate with an identifier for resets including a CustomGroupID.
				Set to 0 to ignore.

Example Reset Risk Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	30 00	48 bytes
MessageType	56	Reset Risk
MatchingUnit	00	Always 0 for inbound messages
SequenceNumber	64 00 00 00	Sequence number 100
RiskStatusID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00	
RiskReset	53 46 00 00 00 00 00 00	SF = Symbol and Firm level reset
Reserved	00 00 00 00	
ClearingFirm	54 45 53 54	TEST
RiskRoot	41 42 43 00 00 00	ABC
CustomGroupID	00 00	No CustomGroupID

4.1.11 New Complex Instrument (C1, C2, and EDGX Only)

A New Complex Instrument message is used to request that the system create a complex strategy. The resulting symbol (if accepted by the system) will be returned in a Complex Instrument Accepted message; a Complex Instrument Rejected message will be sent if it is not accepted. All legs must have the same underlying product which can be different OSI Roots (i.e. XYZ and XYZ1).

A ClearingFirm must be sent on each New Complex Instrument message unless a Default Executing Firm ID is set at the port-level.

©2019 Cboe Global Markets, Inc.

Permitted input optional fields are described in 'Section 5.8 – New Complex Instrument'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.
MessageType	4	1	Binary	0x4C
MatchingUnit	5	1	Binary	Always 0 for inbound (Member to Cboe) messages.
SequenceNumber	6	4	Binary	The sequence number for this message.
ClOrdID	10	20	Text	Corresponds to ClOrdID (11) in Cboe FIX.
				Day-unique ID chosen by the client. Characters in the ASCII range 33-126 are allowed, except for comma, semicolon, and pipe.
				If the CIOrdID matches a live order, the order will be rejected as duplicate.
				Note: Choe only enforces uniqueness of
				ClOrdID values among currently live orders.
				However, we strongly recommend that you keep your <i>ClOrdID</i> values day-unique.
NumberOf NewComplex InstrumentBitfields	30	1	Binary	Bitfield identifying which bitfields are set. Field values must be appended to the end of the message.
NewComplex InstrumentBitfield ¹	31	1	Binary	Bitfield identifying fields to follow.
NewComplex InstrumentBitfield ⁿ		1	Binary	Last bitfield.
NoLegs		1	Binary	Corresponds to NoLegs (555) in Cboe FIX.
				Indicates the number of repeating groups to follow.
				Must be a minimum of 2 and a maximum of 12.

Repeating Group *ComplexLeg* must occur the number of times specified in *NoLegs*. Each field occurs in each group, in order as shown below. Optional fields occur only if corresponding bits in bitfields are set.

LegSymbol	8	Alphanumeric	Corresponds to <i>LegSymbol</i> (600) in Cboe FIX. Entire Cboe format symbol or OSI Root. Must send <i>LegCFICode</i> , <i>LegMaturityDate</i> , and
LegCFICode (Optional)	6	Alphanumeric	LegStrikePrice if using OSI format. Corresponds to LegCFICode (608) in Cboe FIX. CFI Code for leg. Required if LegSymbol is in OSI format. OP = Options Put OC = Options Call E = Equity
LegMaturityDate (Optional)	4	Date	Corresponds to <i>LegMaturityDate</i> (611) in Cboe FIX. Required if <i>LegSymbol</i> is in OSI format.
LegStrikePrice (Optional)	8	Binary Price	Corresponds to <i>LegStrikePrice</i> (612) in Cboe FIX. Option strike price. System maximum is 99,999,999. Must be non-negative.

©2019 Cboe Global Markets, Inc.

				Required if <i>LegSymbol</i> is in OSI format.
	LegRatioQty	4	Binary	Corresponds to LegRatioQty (623) in Cboe FIX.
				Ratio of number of contracts in this leg per order quantity.
				Must be between 1 and 99,999.
	LegSide	1	Alphanumeric	Corresponds to <i>LegSide</i> (624) in Cboe FIX.
				1 = Buy 2 = Sell
Op	tional fields			Optional fields as set in the bitmap. Note, optional fields that occur in the repeating groups appear above, repeating per group, not within this block.

Example New Complex Instrument Message:

Field Name StartOfMessage MessageLength MessageType MatchingUnit SequenceNumber ClOrdID	Hexadecimal BA BA 61 00 4C 00 64 00 00 00 41 42 43 31 32 33 00 00 00 00 00 00 00 00 00 00 00 00	Notes Start of message bytes. 97 bytes New Complex Instrument Always 0 for inbound messages Sequence number 100 ABC123

4.2 Cboe to Member

4.2.1 Order Acknowledgment

Order Acknowledgment messages are sent in response to New Order and New Complex Order messages. The message corresponds to a FIX Execution Report with *ExecType* (150) = 0 (New).

Per the instructions given in a Return Bitfields Parameter Group on the Login Request (Section 3.1.1 – Login Request), optional fields may be appended to echo back information provided in the original New Order message. Fields which have been requested to be echoed back but which were not filled in will still be sent, but filled with binary zero (0x00).

Permitted return optional fields are described in 'Section 6.1 – Order Acknowledgement'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x25
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
ClOrdID	18	20	Text	Echoed back from the original order.
OrderID	38	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX. Order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
ReservedInternal	46	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	47	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	48	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example Order Acknowledgment Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	4E 00	78 bytes
MessageType	25	Order Acknowledgment
MatchingUnit	03	Matching Unit 3
SequenceNumber	64 00 00 00	Sequence number 100
TransactionTime	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
ClOrdID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00 00 00 00	
OrderID	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
ReservedInternal	00	Ignore

©2019 Cboe Global Markets, Inc.

NumberOfReturn	03	Three bitfields to follow
Bitfields		
ReturnBitfield1	00	No bitfields from byte 1
ReturnBitfield2	41	Symbol, Capacity
ReturnBitfield3	05	Account, ClearingAccount
Symbol	31 32 33 61 42 63 00 00	123aBc
Capacity	50	P = Principal
Account	41 42 43 00 00 00 00 00 00 00	ABC
	00 00 00 00 00	
ClearingAccount	00 00 00 00	

Example Minimal Order Acknowledgment Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	2E 00	46 bytes
MessageType	25	Order Acknowledgment
MatchingUnit	03	Matching Unit 3
SequenceNumber	64 00 00 00	Sequence number 100
TransactionTime	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
ClOrdID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00 00 00 00	
OrderID	05 10 1E B7 5E 39 2F 02	171WC1000005 (base 36)
ReservedInternal	00	Ignore
NumberOfReturn Bitfields	00	No bitfields to follow

4.2.2 Cross Order Acknowledgment (C1 and EDGX Only)

Cross Order Acknowledgment messages are sent in response to New Order Cross and New Order Cross Multileg messages. The message corresponds to a FIX Execution Report with ExecType (150) = 0 (New). In FIX, multiple execution reports could be generated from one new cross order message.

Per the instructions given in a Return Bitfields Parameter Group on the Login Request (Section 3.1.1 – Login Request), optional fields may be appended to echo back information provided in the original New Order Cross message. Fields which have been requested to be echoed back but which were not filled in will still be sent, but filled with binary zero (0x00).

In each repeating group, the *ClOrdID* and *OrderId* are always returned. Beyond that, the bits specified in the optional return bitfields parameter group control which fields are returned. Any fields that appear in the repeating groups will not appear in the optional fields that come after the repeating groups.

Permitted return optional fields are described in 'Section 6.2 – Cross Order Acknowledgement'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x43
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.

©2019 Cboe Global Markets, Inc.

TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
CrossID	18	20	Text	Corresponds to <i>CrossID</i> (548) in Cboe FIX.
0.000.2			- CALC	. ,
				Echoed back from the original order.
AuctionId	38	8	Binary	Corresponds to <i>AuctionId</i> (9370) in Cboe FIX.
				Auction order identifier supplied by Cboe. This
				identifier corresponds to the identifiers used in
				Cboe market data products.
ReservedInternal	46	1	Binary	Reserved for Cboe internal use.
NumberOfReturn	47	1	Binary	Number of bitfields to follow.
Bitfields				
ReturnBitfield ¹	48	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
GroupCnt		2	Binary	Number of order allocations represented by
				repeating groups included in this message.
Repeating Groups				
Of				
ClOrdId		20	Text	Echoed back from the original order.
OrderId		8	Binary	OrderId assigned by the matching engine.

4.2.3 Quote Update Acknowledgment

Quote Update Acknowledgment messages are sent in response to a Quote Update message. The effect of each requested update will be found in this response. The ordering between request and response is preserved.

For quotes not marked post only which are priced at an executable price and which may remove liquidity against non-Market Maker liquidity, *QuoteResult* reason of "D" or "d" will be provided. In these cases, executions or cancellations (as needed) will immediately follow as additional messages. In some cases, an execution may not be permitted (e.g., risk management causes cancellation of the targeted order before execution), no additional messages will follow and the quote will post.

In some cases, a new *OrderID* will be assigned for an existing quote. There are currently two situations where this occurs, but others may be added in the future:

- 1. A partially executed quote will be assigned a new *OrderID* on a quote update.
- 2. An order which has received a large number of quote updates over its life will be assigned a new *OrderID* if receiving an update which would cause a loss in priority.

If using the *OrderID* in your system or to correlate with an *OrderID* on PITCH, always be prepared to receive an update on an Quote Update Acknowledgment.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x51
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH. Unsequenced application message. <i>MatchingUnit</i> will be set to 0.
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.

©2019 Cboe Global Markets, Inc.

				This will be an unsequenced application message. The sequence number will be set to 0.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
QuoteUpdateID	18	16	Text	Echoed back from the Quote Update request.
QuoteRejectReason	34	1	Text	Reason for rejection of an entire Quote Update message by the matching engine. If an error is indicated, then no quotes were entered or updated. QuoteCnt will be 0. <space> = Success See Quote Reason Codes for a list of possible quote reject codes. Additional reasons may be added in the future</space>
				without warning.
Reserved	35	17	Binary	Reserved for future expansion. Filled with 0.
QuoteCnt	52	1	Binary	Number of repeating groups included in this
				acknowledgment. Allowed values are 1-20.
Repeating Groups of			5.	
OrderID		8	Binary	Order ID assigned by the matching engine. Corresponds to order ID on PITCH.
QuoteResult		1	Text	Result of the quote request.
				Acceptance: A = New Quote L = Modified; loss of priority R = Modified; retains priority (size reduction) N = No change, matches existing quote D = New Quote, but may remove liquidity d = Modified, but may remove liquidity V = No change, existing constituent series quote modify attempt after cutoff time (C1 only) Cancellation: U = User cancelled (zero size/price requested) Rejection:a = Admin P = Rejected, can't post f = Risk management firm or Custom Group ID level S = Rejected, symbol not found p = Rejected, invalid price r = Invalid Remove s = Risk management risk root level u = Rejected, other reason + = Risk management EFID Group level c = Rejected, attempt to add constituent series quote after cutoff time (C1 only)
				Additional reasons indicating a reject may be added in the future with no notice.

Reserved	00 00 00 00 00 00	

4.2.4 Order Rejected

Order Rejected messages are sent in response to a New Order which must be rejected. This message corresponds to a FIX Execution Report with ExecType (150) = 8 (Rejected). Order Rejected messages are unsequenced.

Permitted return optional fields are described in 'Section 6.4 – Order Rejected'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.
MessageType	4	1	Binary	0x26
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
SequenceNumber	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.

©2019 Cboe Global Markets, Inc.

TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
ClOrdID	18	20	Text	Echoed back from the original order.
OrderRejectReason	38	1	Text	Reason for an order rejection.
				See Order Reason Codes for a list of possible reasons.
Text	39	60	Text	Human readable text with more information about the reject reason.
ReservedInternal	99	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	100	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	101	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields

4.2.6 Quote Update Rejected

Quote Update Rejected messages are sent in response to a Quote Update message when the entire quote block is rejected by the order handler. No existing quotes are updated or cancelled as a result.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x58
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
SequenceNumber	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
QuoteUpdateID	18	16	Text	Echoed back from the Quote Update request.
QuoteRejectReason	34	1	Text	Reason for rejection of an entire Quote Update message.
				See Quote Reason Codes for a list of possible quote reject codes.
				Additional reasons may be added in the future without warning.
Reserved	35	17	Binary	Reserved for future expansion. Filled with 0.

Example Quote Update Rejected Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes
MessageLength	32 00	50 bytes
MessageType	58	Quote Update Rejected
MatchingUnit	0	Unsequenced message, unit = 0
SequenceNumber	00 00 00 00	Unsequenced message, sequence = 0
TransactionTime	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
QuoteUpdateID	41 42 43 31 32 33 00 00 00 00	ABC123

4.2.7 Order Modified

Order Modified messages are sent in response to a Modify Request to indicate that the order has been successfully modified.

Note: You must opt-in to receiving *LeavesQty* in Order Modified messages. In some cases, the last message to be received on an order's lifecycle will be an Order Modified message. The way to know the order is no longer live is to inspect *LeavesQty*. An example of this would be modification of an order whilst an execution is being generated, resulting in the order being reduced to zero outstanding quantity.

Permitted return optional fields are described in 'Section 6.6 – Order Modified'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x27
MatchingUnit	5	1	Binary	The Matching Unit which created this message. Matching units in BOE correspond to Matching Units on Multicast PITCH.
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per Matching Unit.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
ClOrdID	18	20	Text	Client order ID. This is the <i>ClOrdID</i> from the Modify Order message.
OrderID	38	8	Binary	Corresponds to OrderID (37) in Cboe FIX.
				The unique <i>OrderID</i> . Modifications do <i>not</i> change the <i>OrderID</i> .
ReservedInternal	46	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	47	1	Binary	Number of bitfields to follow.
ReturnBitfield¹	48	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example Order Modified Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	35 00	63 bytes
MessageType	27	Order Modified
MatchingUnit	03	Matching Unit 3
SequenceNumber	64 00 00 00	Sequence number 100
TransactionTime	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000

ReturnBitfield3	00	No fields from byte 3
ReturnBitfield4	00	No fields from byte 4
ReturnBitfield5	02	LeavesQty
Price	08 E2 01 00 00 00 00 00	12.34
LeavesQty	00 00 00 00	0 (order done)

4.2.8 Order Restated

Order Restated messages are sent to inform the Member that an order has been asynchronously modified for some reason without an explicit Modify Order request having been sent. Some example (non-exhaustive) reasons for Order Restated messages being sent:

- A reserve (iceberg) order has been reloaded (BZX, C1, and C2 Only).
- An order's remaining quantity was decremented because of a prevented wash trade.
- An order is represented on the Cboe Options Trading Floor (C1 Only).
- A routed order has returned to rest on the book after matching liquidity on another market.

Members should be prepared to accept and apply Order Restated messages for any reason. The return bitfields indicate the characteristics of the order which have changed. Optional fields will be present at the end of the message with the new values.

Note: You must opt-in to receiving *LeavesQty* in Order Restated messages. In some cases, the last message to be received on an order's lifecycle will be an Order Restated message. The way to know the order is no longer live is to inspect *LeavesQty*. An example of this would be restatement of an order in some cases due to *PreventMatch* being set to d.

Permitted return optional fields are described in 'Section 6.7 – Order Restated'.

Field	Offset	Length	Data Type	Description	
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.	
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.	
MessageType	4	1	Binary	0x28	
MatchingUnit	5	1	Binary	The Matching Unit which created this message. Matching units in BOE correspond to Matching Units on Multicast PITCH.	
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per Matching Unit.	
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).	
ClOrdID	18	20	Text	The ClOrdID is the identifier from the open order.	
OrderID	38	8	Binary	Corresponds to OrderID (37) in Cboe FIX.	
				The unique <i>OrderID</i> . For informational purposes only. Restatements do <i>not</i> change the <i>OrderID</i> .	
RestatementReason	46	1	Alphanumeric	The reason for this Order Restated message.	
				E = Reduction of OrdQty due to Equity Leg Reject (C1 only) F = Represented on Floor (C1 only) L = Reload P = Price Sliding Reprice Q = Liquidity Updated R = Reroute S = Ship and Post (SWP) W = Wash	

©2019 Cboe Global Markets, Inc.

				f = Unsolicited Floor Action (C1 only)
				Cboe reserves the right to add new values as necessary without prior notice.
ReservedInternal	47	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	48	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	49	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example Order Restated Message for a reserve (iceberg) reload:

Field Name	He	xade	ecim	al							Notes

4.2.9 Quote Restated

Quote Restated messages are sent to inform the Member that an order has been asynchronously modified for some reason by the Exchange. For quotes, this could happen if the MTP decrement method has been used by an inbound order against a resting quote. On BZX Options, if a hidden working price is covered by an inbound post only order or quote, a restatement will also occur. Additional reasons may be added in the future.

This message may be expanded in length in the future with new fields added to the end. To maintain forward compatibility, be prepared to receive a message longer than the documented length and to gracefully ignore those extra fields.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be OxBA OxBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.

©2019 Cboe Global Markets, Inc.

MessageType	4	1	Binary	0x52	
MatchingUnit	5	1	Binary	The Matching Unit which created this message. Matching units in BOE correspond to Matching Units on Multicast PITCH.	
SequenceNumber	6	4	Binary The sequence number for this message. D per Matching Unit.		
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).	
QuoteUpdateID	18	16	Text	Echoed back from the most recent Quote Upda request for this quote.	
OrderID	34	8	Binary	Corresponds to OrderID (37) in Cboe FIX.	
				The unique <i>OrderID</i> . For informational purposes only. Restatements do <i>not</i> change the <i>OrderID</i> .	
LeavesQty	42	4	Binary	New quantity available for execution	
WorkingPrice	46	8	Binary	New working price	
Symbol	54	6	Alphanumeric	Cboe native identifier	
Side	60	1	Alphanumeric	1 = Buy 2 = Sell	
RestatementReason	61	1	Alphanumeric	The reason for this Quote Restated message.	
				 K = Price sliding reprice (BZX only) Q = Liquidity W = Wash 	
				Cboe reserves the right to add new values as necessary without prior notice.	

Example Quote Restated Message:

4.2.10 User Modify Rejected

User Modify Rejected messages are sent in response to a Modify Order for an order which cannot be modified. User Modify Rejected messages are unsequenced.

This message corresponds to a FIX Execution Report with *MsgType* (35) = 9 (Order Cancel Reject) and *CxIRejResponseTo* (434) = 2 (Order Cancel/Replace Request).

Permitted return optional fields are described in 'Section 6.8 – User Modify Rejected'.

©2019 Cboe Global Markets, Inc.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.
MessageType	4	1	Binary	0x29
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
SequenceNumber	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
ClOrdID	18	20	Text	The <i>ClOrdID</i> of the modify request which was rejected.
ModifyReject Reason	38	1	Text	Reason for a modify rejection. See Order Reason Codes for a list of possible reasons.
Text	39	60	Text	Human readable text with more information about the reject reason.
ReservedInternal	99	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	100	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	101	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example User Modify Rejected Message:

Field Name	Hexa	decim	nal							Notes
StartOfMessage	BA B	βA								Start of message bytes.
MessageLength	63 0	0								99 bytes

4.2.12 Quote Cancelled

A Quote Cancelled message will be sent to indicate an unsolicited cancellation of a quote entered with a Quote Update message. An unsolicited cancellation is used, for example, when a resting quote is cancelled due to MTP with an inbound order or quotes are being cancelled due to a risk trip.

This message may be expanded in length in the future with new fields added to the end. To maintain forward compatibility, be prepared to receive a message longer than the documented length and to gracefully ignore those extra fields.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the
				StartOfMessage field.
MessageType	4	1	Binary	0x53
				The matching unit which created this message.
				Matching units in BOE correspond to matching
MatchingUnit	5	1	Binary	units on Multicast PITCH.
3			,	Unsequenced application message. MatchingUnit
				will be set to 0.
				The sequence number for this message. Distinct
				per matching unit.
SequenceNumber	6	4	Binary	This will be an unsequenced application message.
				The sequence number will be set to 0.
				The time the event occurred in the Cboe
TransactionTime	10	8	DateTime	Matching Engine (not the time the message was
				sent).
				Echoed back from the most recent Quote
QuoteUpdateID	18	16	Text	Update request for this quote.
OrderID	34	8	Binary	Order ID assigned by the matching engine
Symbol	42	6	Alphanumeric	Cboe native identifier
Side	48	1	Alphanumeric	1 = Buy
				2 = Sell
				Reason for the quote cancellation.
				See Order Reason Codes for a list of possible
CancelReason	49	1	Text	reasons.

Example Quote Cancelled Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	30 00	48 bytes
MessageType	53	Quote Cancelled
MatchingUnit	03	Matching Unit 3
SequenceNumber	64 00 00 00	Sequence number 100

4.2.13 Cross Order Cancelled (C1 and EDGX Only)

A New Order Cross has been cancelled. Individual order allocations from the original New Order Cross and New Order Cross Multileg message will be echoed back in the repeating groups.

In each repeating group, the *ClOrdID* and *OrderId* are always returned. Beyond that, the bits specified in the optional return bitfields parameter group control which fields are returned. Any fields that appear in the repeating groups will not appear in the optional fields that come after the repeating groups.

Permitted return optional fields are described in 'Section 6.10 – Cross Order Cancelled'.

Field	Offset	Length	Data Type	Description	
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.	
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.	
MessageType	4	1	Binary	0x46	
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.	
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.	
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).	
CrossID	18	20	Text	The cross order which was cancelled.	
CancelReason	38	1		Reason for the order cancellation.	
			Text	See Order Reason Codes for a list of possible reasons.	
ReservedInternal	39	1	Binary	Reserved for Cboe internal use.	
NumberOfReturn Bitfields	40	1	Binary	Number of bitfields to follow.	
ReturnBitfield ¹	41	1	Binary	Bitfield identifying fields to return.	
ReturnBitfield ⁿ		1	Binary	Last bitfield.	
GroupCnt		2	Binary	Number of order allocations represented by repeating groups included in this message.	
Repeating Groups Of					
ClOrdID		20	Text	Copied from original cross order.	
OrderID		8	Binary	The order id of the cross order that was cancelled.	
Side (Optional)		1	Alphanumeric	See List of Optional Fields.	
AllocQty (Optional)		4	Binary	See List of Optional Fields.	
Capacity		1	Alpha	See List of Optional Fields.

NumberOfReturn Bitfields	00 No optional fields

4.2.15 Order Execution

An Order Execution is sent for each fill on an order.

©2019 Cboe Global Markets, Inc.

Rather than returning a monetary value indicating the rebate or charge for an execution, the *FeeCode* is an indication of a fee classification corresponding to an item on the venue's fee schedule.

For executions involving complex orders (EDGX or C2 only), an Order Execution message will be generated for the complex order, with *MultilegReportingType* = 3, followed by Order Execution messages for each leg, with *MultilegReportingType* = 2. You must opt-in to receiving this optional field on Order Execution messages at login in order to receive this field.

The symbology used on executions for complex orders, including the legs, will **always** be Cboe symbology.

Permitted return bitfields are described in 'Section 6.12 – Order Execution'.

Field	Offset	Length	Data Type	Description	
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.	
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.	
MessageType	4	1	Binary	0x2C	
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.	
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.	
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).	
ClOrdID	18	20	Text	Order receiving the execution.	
ExecID	38	8	Binary	Corresponds to ExecID (17) in Cboe FIX.	
				Execution ID. Unique across all matching units on given day. Note: <i>ExecIDs</i> will be represented on ODROP and FIXDROP ports as nine character, bas 36 ASCII. Leading zeros should be added if the converted base 36 value is shorter than nine characters.	
				Example conversion:	
				Decimal Base 36	
				28294005440239 A1234B567	
				76335905726621 R248BC23H	
		_		728557228187 09AP05V2Z	
LastShares	46	4	Binary	Corresponds to <i>LastShares</i> (32) in Cboe FIX.	
				Executed share quantity.	
LastPx	50	8	Binary Price	Corresponds to <i>LastPx</i> (31) in Cboe FIX.	
				Price of this fill. Note the use of Binary Price type to represent positive and negative prices, which can occur with complex instruments.	
LeavesQty	58	4	Binary	Corresponds to <i>LeavesQty</i> (151) in Cboe FIX.	
				Quantity still open for further execution. If zero, the order is complete.	
BaseLiquidity Indicator	62	1	Alphanumeric	Indicates whether the trade added or removed liquidity.	
				A = Added Liquidity R = Removed Liquidity X = Routed to Another Market C = Auction/Uncrossing	

©2019 Cboe Global Markets, Inc.

SubLiquidityIndicator	63	1	Alphanumeric	Cboe may add additional values without notice. Members must gracefully ignore unknown values.
				ASCII NUL (0x00) = No additional information S = Execution from order that set the NBBO B = Step Up Mechanism (EDGX Only) b = AIM (C1 and EDGX Only) q = QCC (C1 and EDGX Only) s = SAM (C1 Only) Effective on EDGX TBD
ContraBroker	64	4	Alphanumeric	Corresponds to <i>ContraBroker</i> (375) in Cboe FIX.
				Internally matched executions will identify the OCC clearing number on the execution.
				All externally matched (routed) executions will identify the away exchange.
				AMEX = Routed to NYSE American ARCA = Routed to NYSE Arca BATS = Routed to Cboe BZX Exchange* BOX = Routed to BOX CBOE = Routed to CBOE CTWO = Routed to C2 EDGX = Routed to Cboe EDGX Exchange* EMLD = Routed to MIAX Emerald GMNI = Routed to Nasdaq GEMX ISE = Routed to Nasdaq ISE MERC = Routed to Nasdaq MRX MIAX = Routed to MIAX Options Exchange NOMX = Routed to Nasdaq NOBX = Routed to Nasdaq BX PERL = Routed to MIAX PEARL PHLX = Routed to Nasdaq PHLX
ReservedInternal	68	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	69	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	70	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields

4.2.16 Quote Execution

A Quote Execution message is used to indicate an execution has occurred on a resting quote.

This message may be expanded in length in the future with new fields added to the end. To maintain forward compatibility, be prepared to receive a message longer than the documented length and to gracefully ignore those extra fields.

Field	Offset	Length	Data Type	Description		
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.		
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.		
MessageType	4	1	Binary	0x54		
MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.		
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.		
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).		
QuoteUpdateID	18	16	Text	Echoed back from the most recent Quote Update request for this quote.		
OrderID	34	8	Binary	Order ID assigned by the matching engine		
ExecID	42	8	Binary	Corresponds to ExecID (17) in Cboe FIX. Execution ID. Unique across all matching units on a given day. Note: ExecIDs will be represented on FIXDROP ports as nine character, base 36 ASCII. Leading zeros should be added if the converted base 36 value is shorter than nine characters. Example conversion: Decimal Base 36 28294005440239 A1234B567		
				76335905726621 R248BC23H 728557228187 09AP05V2Z		
Symbol	50	6	Alphanumeric	Cboe native identifier		
ClearingFirm	56	4	Alpha	Echoed back from the original quote		
LastShares	60	4	Binary	Coresponds to <i>LastShares</i> (32) in Cboe FIX. Number of contracts being traded.		

©2019 Cboe Global Markets, Inc.

LastPx	64	8	Binary Price Corresponds to LastPx (31) in Cboe FIX.	
			Price of this fill.	
LeavesQty	72	4	Binary	Corresponds to <i>LeavesQty</i> (151) in Cboe FIX.
				Quantity still open for further execution. If zero,
				the order is complete.
ContraTrader	76	4	Alphanumeric	Displays the EFID (ClearingFirm) of the contra
				side firm on all internally matched executions.
ContraCapacity	80	1	Alphanumeric	Capacity of the contra for this execution.
Side	81	1	Alpha	1 = Buy
				2 = Sell
BaseLiquidity	82	1	Alpha	Indicates whether the trade added or removed
Indicator				liquidity.
				A = Added Liquidity
				R = Removed Liquidity
				C = Auction/Uncrossing
SubLiquidityIndicator	83	1	Alpha	Cboe may add additional values without notice. Members must gracefully ignore unknown values.
				ASCII NUL (0×00) = No additional information
				S = Execution from order that set the NBBO
				B = Step Up Mechanism (EDGX Only)
				b = Bats Auction Mechanism (EDGX Only)
				q = QCC (C1 and EDGX Only) s = SAM (C1 Only) Effective on EDGX TBD
FeeCode	84	2	Alphanumeric	Corresponds to FeeCode (9882) in Cboe FIX.
MarketingFeeCode	86	2	Alphanumeric	Corresponds to <i>MarketingFeeCode</i> (5937) in Cboe
wantelligi eecode	00	_	Aiphanumenc	FIX.
				EDGX Only. Will be blank on other Exchanges.

4.2.17 Trade Cancel or Correct

Used to relay a trade which has been cancelled (busted) or corrected (price or size change only). The *CorrectedPrice* and optional *CorrectedSize* fields will be set to 0 for cancelled trades and to the new trade price and/or size for corrected trades. Trade Cancel or Correct can be sent for same day as well as previous day trades.

Trade cancels or corrections to complex instruments will result in individual Trade Cancel or Correct messages being sent for each leg. No cancels or corrections will be sent for complex instruments.

Permitted return bitfields are described in 'Section 6.13 – Trade Cancel or Correct'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this
				field but not including the two bytes for the
				StartOfMessage field.
MessageType	4	1	Binary	0x2D
MatchingUnit	5	1	Binary	The matching unit which created this message.
				Matching units in BOE correspond to matching
	_	_		units on Multicast PITCH.
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching
TransactionTime	10	٥	DateTime	Engine (not the time the message was sent).
ClOrdID	18	20	Text	CIOrdID of the order whose fill is being cancelled or corrected.
OrderID	38	8	Binary	Corresponds to <i>OrderID</i> (37) in Cboe FIX.
Orderid	36	0	Біпагу	
				Order whose fill is being cancelled or corrected.
ExecRefID	46	8	Binary	Corresponds to ExecRefID (19) in Cboe FIX.
				Refers to the ExecID of the fill being cancelled or
				corrected.
Side	54	1	Alphanumeric	Side of the order.
BaseLiquidity Indicator	55	1	Alphanumeric	Indicates whether the trade added or removed liquidity.
				A = Added Liquidity
				R = Removed Liquidity
				X = Routed to Another Market
				C = Auction/Uncrossing
ClearingFirm	56	4	Alpha	Echoed back from the original order.
ClearingAccount	60	4	Text	Echoed back from the original order.
LastShares	64	4	Binary	Number of shares of the trade being cancelled.
LastPx	68	8	Binary Price	Price of the trade being cancelled.
				Note the use of <i>Binary Price</i> type to represent
				positive and negative prices, which can occur with
				complex instruments.
CorrectedPrice	76	8	Binary Price	For trade corrections, this is the new trade price.
				For trade breaks, this is set to 0.
OrigTime	84	8	DateTime	Corresponds to OrigTime (42).
				The date and time of the original trade, in GMT.

©2019 Cboe Global Markets, Inc.

ReservedInternal	92	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	93	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	94	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example Trade Cancel or Correct Message:

Field Name StartOfMessage MessageLength MessageType MatchingUnit SequenceNumber TransactionTime ClOrdID	Hexadecimal BA BA 76 00 2D 03 64 00 00 00 E0 FA 20 F7 36 71 F8 11 41 42 43 31 32 33 00 00 00 00	Notes Start of message bytes. 118 bytes Trade Cancel or Correct Matching Unit 3 Sequence number 100 1,294,909,373,757,324,000 ABC123

4.2.18 Purge Rejected

A Purge Rejected message is sent in response to a Purge Orders message to indicate that the mass cancellation cannot occur. Purge Rejected messages are unsequenced.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.

©2019 Cboe Global Markets, Inc.

MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x48
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
SequenceNumber	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
PurgeRejectReason	18	1	Text	Reason for a purge rejection.
				See Order Reason Codes for a list of possible reasons.
Text	19	60	Text	Human readable text with more information about the reject reason.
ReservedInternal	79	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	80	1	Binary	Number of bitfields to follow.
ReturnBitfield ₁	81	1	Binary	Bitfield identifying fields to return.
ReturnBitfield₁		1	Binary	Last bitfield.

4.2.19 Reset Risk Acknowledgment

Response to a ${\tt Reset}\ {\tt Risk}\ request.$

Field	Offset	Length	Data Type	Description	
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.	
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.	
MessageType	4	1	Binary	0x57	
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.	
SequenceNumber	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.	
RiskStatusID	10	16	Text	Unique identifier for this Reset Risk request. Response message will have this corresponding identifier.	
RiskResetResult	26	1	Text	<pre><space> = Ignored; exceeds 1 reset per second Y = Success F = Rejected; exceeds firm reset limit C = Rejected; exceeds Custom Group ID limit D = Rejected; automatic risk resets are disabled E = Rejected; empty ResetRisk field I = Rejected; Incorrect data center S = Rejected; exceeds risk root reset limit U = Rejected; invalid RiskRoot c = Rejected; invalid EFID/ClearingFirm y = Rejected; in replay Additional reject values may be added in the future with no notice.</space></pre>	

Example Risk Reset Acknowledgment Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes.
MessageLength	19 00	25 bytes
MessageType	57	Risk Reset Acknowledgement
MatchingUnit	00	Unsequenced Message, unit = 0
SequenceNumber	00 00 00 00	Unsequenced Message, sequence = 0
RiskStatusID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00	
RiskResetResult	00	Y = Success

©2019 Cboe Global Markets, Inc.

4.2.20 Mass Cancel Acknowledgment

A Mass Cancel Acknowledgment is an unsequenced message sent when a Cancel Order or Purge Orders message requesting a mass cancellation has completed cancelling all individual orders.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x36
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
SequenceNumber	6	4	Binary	Unsequenced application. Message. Sequence number will be set to 0.
TransactionTime	10	8	DateTime	The time in the order entry gateway when the final matching engine event was received to complete the mass cancel.
MassCancelID	18	20	Text	Copied from the MassCancelID passed on the original Cancel Order or Purge Orders. This field corresponds to MassCancelID (7695) in Cboe FIX.
CancelledOrder Count	38	4	Binary	Number of orders cancelled. This field corresponds to CancelledOrderCount (7696) in Cboe FIX.
ReservedInternal	42	1	Binary	Reserved for Cboe internal use.

Example Mass Cancel Acknowledgment Message:

Field Name	lexadecimal N	otes
StartOfMessage	.A St	tart of message bytes.
MessageLength	9 00 4	1 bytes
MessageType	6 M	ass Cancel Acknowledgment
MatchingUnit	0 U	nsequenced Message, unit = 0
SequenceNumber	0 00 00 00 U	nsequenced Message, sequence = 0
TransactionTime	0 FA 20 F7 36 71 F8 11 1	,294,909,373,757,324,000
MassCancelID	1 42 43 31 32 33 00 00 00 00 A	BC123
	0 00 00 00 00 00 00 00 00 00	
CancelledOrderCount	3 00 00 00 99	9 orders were cancelled
ReservedInternal	0	gnore

4.2.21 Complex Instrument Accepted (C1, C2, and EDGX Only)

The Complex Instrument Accepted is used to indicate acceptance of a complex strategy. The leg order sent back may differ from the originating request; *RevisedLegs* will indicate if the leg order has been altered from the original request.

Permitted return bitfields are described in 'Section 6.14 - Complex Instrument Accepted'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the <i>StartOfMessage</i> field.
MessageType	4	1	Binary	0x4D

©2019 Cboe Global Markets, Inc.

MatchingUnit	5	1	Binary	The matching unit which created this message. Matching units in BOE correspond to matching units on Multicast PITCH.
SequenceNumber	6	4	Binary	The sequence number for this message. Distinct per matching unit.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
ClOrdID	18	20	Text	Echoed back from the original request.
Symbol	38	8	Alphanumeric	The complex instrument id.
RevisedLegs	46	1	Alphanumeric	Indicates if the legs on the created complex strategy have been reordered from the original request.
				If the legs were reordered, the order of the Open-Close fields on a New Complex Order must be the order returned by the exchange, not the order from the original request.
				1 = Legs were not reordered
				2 = Legs were reordered
NoOfSecurities	47	4	Binary	Correspondes to <i>NoOfSecurities</i> (8641) in Cboe FIX. Indicates the number of securities created by the member in the trading session.
ReservedInternal	51	1	Binary	Reserved for Cboe internal use.
NumberOf ReturnBitfields	52	1	Binary	Number of bitfields to follow.
ReturnBitfield ¹	53	1	Binary	Bitfield identifying fields to follow.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
NoLegs		1	Binary	Echoed back from the original request.

Repeating Group *ComplexLeg* must occur the number of times specified in *NoLegs*. Each field occurs in each group, in order as shown below. Optional fields occur only if corresponding bits in bitfields are set.

LegSymbol	8	Alphanumeric	Corresponds to <i>LegSymbol</i> (600) in Cboe FIX. Entire Cboe format symbol or OSI Root.
			Must send LegCFICode, LegMaturityDate, and LegStrikePrice if using OSI format.
LegCFICode	6	Alphanumeric	Corresponds to LegCFICode (608) in Cboe FIX.
			CFI Code for leg. Required if <i>LegSymbol</i> is in OSI format.
			OP = Options Put OC = Options Call
			E = Equity
LegMaturityDate	4	Date	Corresponds to <i>LegMaturityDate</i> (611) in Cboe FIX.
			Required if <i>LegSymbol</i> is in OSI format.
LegStrikePrice	8	Binary Price	Corresponds to <i>LegStrikePrice</i> (612) in Cboe FIX.
			Option strike price. System maximum is 99,999,999. Must be non-negative.
			Required if <i>LegSymbol</i> is in OSI format.

©2019 Cboe Global Markets, Inc.

	LegRatioQty	4	Binary	Corres	ponds to <i>LegRatioQty</i> (623) in Cboe FIX.		
				Ratio of number of contracts in this leg per order quantity.			
				Must b	Must be between 1 and 99,999.		
	LegSide	1	Alphanumeric	Corres	ponds to <i>LegSide</i> (624) in Cboe FIX.		
				1 = Buy 2 = Sell			
Op	ntional fields				Optional fields as set in the bitmap. Note, option fields that occur in the repeating groups appear above, repeating per group, not within this block.	r

4.2.22 Complex Instrument Rejected (C1, C2, and EDGX Only)

The Complex Instrument Rejected message is used to indicate that a requested complex strategy has been rejected. Complex Instrument Rejected messages are unsequenced.

Permitted return bitfields are described in 'Section 6.15 – Complex Instrument Rejected'.

Field	Offset	Length	Data Type	Description
StartOfMessage	0	2	Binary	Must be 0xBA 0xBA.
MessageLength	2	2	Binary	Number of bytes for the message, including this field but not including the two bytes for the StartOfMessage field.
MessageType	4	1	Binary	0x4E
MatchingUnit	5	1	Binary	Unsequenced application message. Matching unit will be set to 0.
SequenceNumber	6	4	Binary	Unsequenced application message. Sequence number will be set to 0.
TransactionTime	10	8	DateTime	The time the event occurred in the Cboe Matching Engine (not the time the message was sent).
ClOrdID	18	20	Text	Echoed back from the original request.

©2019 Cboe Global Markets, Inc.

OrderRejectReason	38	1	Text	Reason for an order rejection.
				See Order Reason Codes for a list of possible reasons.
Text	39	60	Text	Human readable text with more information about the reject reason.
NoOfSecurities	99	4	Binary	Indicates the number of securities created by the member in this trading session.
ReservedInternal	103	1	Binary	Reserved for Cboe internal use.
NumberOfReturn Bitfields	104	1	Binary	Number of bitfields to follow.
ReturnBitfield¹	105	1	Binary	Bitfield identifying fields to return.
ReturnBitfield ⁿ		1	Binary	Last bitfield.
Optional fields				

Example Complex Instrument Rejected Message:

Field Name	Hexadecimal	Notes
StartOfMessage	BA BA	Start of message bytes
MessageLength	67 00	103 bytes
MessageType	4E	Complex Instrument Rejected
MatchingUnit	0	Unsequenced message, unit = 0
SequenceNumber	00 00 00 00	Unsequenced message, sequence = 0
TransactionTime	E0 FA 20 F7 36 71 F8 11	1,294,909,373,757,324,000
ClOrdID	41 42 43 31 32 33 00 00 00 00	ABC123
	00 00 00 00 00 00 00 00 00	
OrderRejectReason	44	D
Text	44 75 70 6C 69 63 61 74 65 20	Duplicate ClOrdID
	43 6C 4F 72 64 49 44 00 00 00	
	00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00	
	00 00 00 00 00 00 00 00 00	
NoOfSecurities	04 00 00 00	Four complex strategies created by sender
ReservedInternal	00	Ignore
NumberOfReturn Bitfields	00	No bitfields follow

5 Input Bitfields Per Message

Legend:

- **R** Indicates that the field must be specified for a message
- Indicates that the field can be specified for a message
- Indicates that the field cannot be requested for a message

(Blank) Indicates that the field is not used by Cboe Options and cannot be specified for a message

Input messages that containing invalid fields (i.e., Blank) will be rejected. In the case of rejected input messages, the associated Reject message sent back to the customer will contain a 'RejectReason' code non-optional field (See **Order Reason Codes**) and a 'Text' non-optional field containing descriptive text.

7 List of Optional Fields

The following are descriptions of optional fields which may be sent or received.

Field	Length	Data Type	Description
Account	16	Text	Corresponds to Account (1) in Cboe FIX.
			Reflected back on execution reports associated with this order and also passed through to the OCC in the Optional Data field (16 characters) and Customer ID field (max 10 characters). May be made available in the Member's clearing file. A maximum of 10 characters will be passed through to the OCC Customer ID Field but up to 16 characters will be maintain internally. Allowed characters are alphanumeric and colon.
			Account (1) will only be mapped to the OCC via the Customer ID field (max 10 characters) and the new ClearingOptionalData (9324) field will be mapped to the OCC via the Optional Data field (16 characters).
AllocQty	4	Binary	Corresponds to AllocQty (80) in Cboe FIX.
			Number of contracts for this party.
			C1 and EDGX only.
AttributedQuote	1	1 Alphanumeric	Optional. Allows for an order to be attributed to a firm's Executing Broker ID in Cboe market data feeds. The order may also be included with attributed summary information displays related to quote/trade information on the Cboe website. Must opt-in to support through the Cboe Trade Desk.
			On a New Order Cross and New Order Cross Multileg this field is only applicable to the Agency order.
			N = Do not attribute firm Executing Broker ID to this order (Default)
			Y = Attribute firm Executing Broker ID to this order
			C = Attribute <i>ClientID</i> only.
			Z = Attribute both <i>ClearingFirm</i> (EFID) and <i>ClientID</i> .
AuctionId	8	Binary	Corresponds to AuctionId (9370) in Cboe FIX.
			Auction order identifier supplied by Cboe. This identifier corresponds to the identifiers used in Cboe market data products.
			C1, C2, and EDGX only.
AutoMatch	1	Alphanumeric	Corresponds to <i>AutoMatch</i> (9040) in Cboe FIX.
			Better-priced responses will be matched by the Contra side. Indicates the type of Auto Match the Contra Order will use. Mutually exclusive with <i>LastPriority</i> . Limit type Auto Match orders require <i>AutoMatchPrice</i> to be supplied.
			0 = Disabled (Default)
			1 = Market
			2 = Limit
			C1 and EDGX only.

©2019 Cboe Global Markets, Inc.

AutoMatchPrice	8	Binary Price	Corresponds to AutoMatchPrice (9044) in Cboe FIX.
			Sets the limit price at which the Contra Order will Auto Match. Required if <i>AutoMatch</i> = 2 (Limit). Ignored otherwise. Must be non-negative.
			1 = Buy
			2 = Sell
			C1 and EDGX only.
AvgPx	8	Binary Price	Corresponds to AvgPx (6) in Cboe FIX.
			Average price of executions for this order weighted by trade size. Zero if <i>CumQty</i> field is zero or if <i>MultilegReportingType</i> = 2.
BaseLiquidityIndicator	1	Alphanumeric	Indicates whether the trade added or removed liquidity.
			A = Added Liquidity
			R = Removed Liquidity
			X = Routed to Another Market
			C = Auction/Uncrossing
CancelOrigOnReject	1	Alpha	Corresponds to <i>CancelOrigOnReject</i> (9619) in Cboe FIX. Indicates handling of original order on failure to modify.
			N = Leave original order alone Y = Cancel original order if modification fails
Capacity	1	Alpha	Corresponds to OrderCapacity (47) in Cboe FIX.
			The capacity of the order.
			C = Customer M = Market Maker F = Firm U = Professional Customer N = Non-Cboe Market Maker B = Broker-Dealer J = Joint Back Office L = Non-Trading Permit Holder Affiliate (C1 and C2 only)
ClearingAccount	4	Text	Corresponds to OnBehalfOfSubID (116) and ClearingAccount (440) in Cboe FIX.
			Supplemental identifier. Recorded and made available in execution reports. Available via Drop feeds.
			When <i>Capacity</i> is set to a value of M or N for Market Maker, this field should be filled with the desired market maker ID. When using CMTA, this value is the Market Maker ID for the CMTA member instead of the Cboe member executing the trade. This field will be sent to the OCC.
			If Capacity is set to something besides Market Maker, this field can be blank or filled out with an optional string that is passed through to the OCC.
ClearingFirm	4	Alpha	Corresponds to OnBehalfOfCompID (115) Cboe FIX.
			EFID that will clear the trade. Port attribute value of 'Default EFID' is used if not provided.

©2019 Cboe Global Markets, Inc.

ClearingOptionalData	16	Text	Corresponds to ClearingOptionalData (9324) in Cboe FIX.
			This field will be reflected back on execution reports, FIX DROP ports and it will be passed through to the OCC in the Optional Data field.
ClientIDAttr	4	Text	Corresponds to ClientID (109) Cboe FIX.
			User defined identifier for quote attribution.
CMTANumber	4	Binary	Corresponds to CMTANumber (439) in Cboe FIX.
			CMTA Number of the firm that will clear the trade. Must be specified for CMTA orders and left unspecified for non-CMTA orders.
ComboOrder	1	Alpha	Corresponds to ComboOrder (22005) in Cboe FIX.
			Declare the order as a Combo (for regulatory relief if trading SPX on the floor).
			N = (Default) No Y = Yes
			C1 only.
Compression	1	Alpha	Corresponds to Compression (22006) in Cboe FIX.
			Order is a compression trade.
			N = (Default) No
			Y = Yes
			C1 only.
ContraCapacity	1	Alphanumeric	Capacity of the contra for this execution. See <i>Capacity</i> for allowed values.
ContraTrader	4	Alphanumeric	Displays the EFID (<i>ClearingFirm</i>) of the contra side firm on all internally matched executions.
CorrectedSize	4	Binary	Corresponds to CorrectedSize (6655) in Cboe FIX.
			Number of shares after trade adjustment.
CrossExclusion	1	Alpha	Corresponds to CrossExclusionIndicator (6438) in Cboe FIX.
Indicator			N = Contracts were executed in auction against Contra party
			or against a resting order when auction was initiated Y = Contracts were executed in auction against another party.
			C1 and EDGX only.
CrossId	20	Text	Corresponds to CrossID (548) in Cboe FIX.
C. 03514	20		Day-unique identier for the cross order chosen by the client.
			Characters in the ASCII range 33-126 are allowed, except for comma, semicolon and pipe.
			C1 and EDGX only.

©2019 Cboe Global Markets, Inc.

CrossType	1	Alphanumeric	Corresponds to <i>CrossType</i> (549) in Cboe FIX.
0.000.7,60			Type of auction order being submitted. This indicates the type of auction that will be initiated upon order entry.
			1 = Automated Improvement Mechamism ("AIM") 2 = Qualified Contingent Cross ("QCC") 3 = Solicitation Cross ("SAM") (C1 only) Effective on EDGX TBD
CrossPrioritization	1	Alphanumeric	Corresponds to CrossPrioritization (550) in Cboe FIX.
			Indicates which side of the cross order will be prioritized for execution. This identifies the Agency side.
			1 = Buy 2 = Sell
			C1 and EDGX only.
CumQty	4	Binary	Corresponds to CumQty (14) in Cboe FIX
			Cumulative quanity of contracts executed for the order over the life of the order, which may be multiple business days in the case of persisting GTC/GTD orders.
CustomGroupID	2	Binary	Corresponds to CustomGroupID (7699) in Cboe FIX for New Order and Purge Orders messages.
			Used to group orders for use in \texttt{Purge} Orders where multiple orders can be cancelled by specifying a list of $\textit{CustomGroupIDs}$.
DayAvgPx	8	Binary Price	Corresponds to <i>DayAvgPx</i> (426) in Cboe FIX.
			Applicable to persisting GTC/GTD orders only. Average price per contract of executions on current business date. Zero if <code>DayCumQty</code> is zero.
DayCumQty	4	Binary	Corresponds to DayCumQty (425) in Cboe FIX.
			Applicable to persisting GTC/GTD orders only. Cumulative quantity of contracts executed for the order during the current business day.
DayOrderQty	4	Binary	Corresponds to DayOrderQty (424) in Cboe FIX.
			Applicable to persisting GTC/GTD orders only. Contracts remaning to be filled for the order at the beginning of the current business day (i.e., OrderQty – CumQty at the end of the previous business day).

Dianlauladianta	1	Alphaniir	Corresponds to DisplayIndicator (0470) in Char FIV
DisplayIndicator	1	Alphanumeric	Corresponds to <i>DisplayIndicator</i> (9479) in Cboe FIX.
			V = Default. As determined by port level setting (default to S)
			S = Display Price Sliding (this is to override a opt-out of Display Price Sliding at the port level (BZX only)
			L = Display Price Sliding, but reject if order crosses NBBO on entry (BZX only)
			M = Multiple Display Price Sliding (BZX only)
			P = Price Adjust
			m = Multiple Price Adjust
			R = Reject the order if it cannot be booked and displayed without adjustment.
			N = NoRescrapeAtLimit (BZX only)
			See 'Display Indicator Features' for more details on sliding options.
DisplayPrice	8	Binary Price	Only present when order is fully or partially booked. If the order has to be displayed at a less aggressive price for some reason, then that price will be reported here, otherwise equals <i>Price</i> .
DisplayRange	4	Binary	Corresponds to <i>DisplayRange</i> (8020) in Cboe FIX.
			Used for random replenishment of reserve orders. Random replenishment establishes a range of possible values for the order quantity that is to be displayed. For example, if MaxFloor = 2,000, and DisplayRange = 200, the displayed quantity will be selected from one of the following values: 1,800, 1,900, 2,000, 2,100, or 2,200. Must be specified in round lots.
DrillThruProtection	8	Binary Price	Corresponds to DrillThruProtection (6253) in Cboe FIX.
			Amount sender is willing to trade through the SNBBO. A zero price provides full SNBBO protection. The price should be entered as a non-negative value.
			Exchange default values are 3% of the opposite of the SNBBO, with a minimum value of \$0.02 and a maximum of \$0.10 for the default value. Values provided on a New Complex Order message do not have a minimum or maximum.
			C1, C2, and EDGX only.
EchoText	64	Text	Corresponds to <i>Text</i> (58) in Cboe FIX. Free format text string. May be echoed back on Cboe to Member messages.
EquityBuyClearingFirm	4	Text	Corresponds to EquityBuyClearingFirm (22014) in Cboe FIX. Clearing firm on buy side of the equity trade associated with a QCC trade.
			Valid when <i>CrossType</i> = '2'.
			C1 and EDGX only.
EquityExDestination	1	Alphanumeric	Corresponds to EquityExDestination (22016) in Cboe FIX.
			Valid when an equity symbol is present in the complex instrument.
			Exchange venue to which equity leg matching will be submitted. Supported values are:

©2019 Cboe Global Markets, Inc.

		1	C = Cowen (default)
			Additional targets planned after C1 migration. If buyer and seller do not match venues, then the equity match will be reported to Cowen ("C").
			C1 only. Effective on EDGX with C1 Feature Pack 9.
EquityLegShortSell	1	Alphanumeric	Corresponds to EquityLegShortSell (22624) in Cboe FIX.
, , ,			5 = Sell Short (for stock leg)
			6 = Sell Short Exempt (for stock leg)
			C1 only. Effective on EDGX with C1 Feature Pack 9.
EquityPartyId	4	Alpha	Corresponds to EquityPartyId (22008) in Cboe FIX.
			MPID used to clear the equity leg being cleared via the Exchange.
			C1 only. Effective on EDGX with C1 Feature Pack 9.
EquitySellClearingFirm	4	Text	Corresponds to EquitySellClearingFirm (22015) in Cboe FIX. Clearing firm on sell side of the equity trade associated with a QCC trade.
			Valid when <i>CrossType</i> = '2'.
			C1 and EDGX only.
EquityTradePrice	8	Binary Price	Corresponds to EquityTradePrice (22011) in Cboe FIX.
			Price at which the equity associated with a QCC trade.
			Valid when <i>CrossType</i> = '2'.
			C1 and EDGX only.
EquityTradeSize	4	Binary	Corresponds to EquityTradeSize (22012) in Choe FIX.
			Number of shares executed in the equity associated with a QCC trade.
			Valid when CrossType = '2'.
			C1 and EDGX only.
EquityTradeVenue	1	Text	Corresponds to EquityTradeVenue (22013) in Cboe FIX.
			Exchange venue where equity associated with a QCC traded.
			Valid when CrossType (549) = '2.
			A = NYSE American
			B = Nasdaq BX
			C = NYSE National
			I = Investors Exchange J = Cboe EDGA Exchange
			K = Cboe EDGX Exchange
			M = CHX
			N = NYSE
			P = NYSE Arca
			Q = Nasdaq
			X = Nasdaq PSX V = Choo PVX Exchange
			Y = Cboe BYX Exchange Z = Cboe BZX Exchange
			C1 and EDGX only.
			CI and LOOK Only.

©2019 Cboe Global Markets, Inc.

	T_	DeteTime	Company of the Faulty-Transport Time - (22000) in China Fiv
EquityTransactTime	8	DateTime	Corresponds to <i>EquityTransactTime</i> (22060) in Cboe FIX. Time of equity trade associated with a QCC trade.
			Valid when <i>CrossType</i> = '2'.
			C1 and EDGX only.
ExDestination	1	Text	Corresponds to ExDestination (100) in Cboe FIX.
			Used to specify the designated away venue for RoutStrategy = DIRC.
			A = NYSE ARCA
			E = NASDAQ ISE
			F = MIAX
			P = MIAX PEARL
			D = MIAX Emerald
			G = EDGX Options
			H = C2
			K = BOX
			N = NASDAQ
			S = NASDAQ BX
			U = NYSE AMERICAN
			W = Cboe Options (C1)
			X = Nasdaq PHLX
			Z = BZX Options
			g = Nasdaq GEMX
			m = Nasdaq MRX
ExecInst	1	Text	Corresponds to ExecInst (18) in Cboe FIX.
			1 = Not held. Must be routed to the floor. (C1 only) f = Intermarket Sweep (Directed or Cboe) r = Settlement Liquidity¹ (C1 only) G = All or None (AON) (C1 and EDGX only) s = Sweep² (C1 and EDGX only) ASCII NULL (0x00) = no special handling
			All other values are ignored.
			¹ Requires <i>TimeInForce</i> = 2 and <i>Price</i> . ² Used for New Order Cross and New Order Cross Multileg only. Requires <i>CrossType</i> = 1 (AIM).
ExpireTime	8	DateTime	Corresponds to ExpireTime (126) in Choe FIX.
			Required for <i>TimeInForce</i> = 6 orders, specifies the date-time (in UTC) that the order expires.
FeeCode	2	Alphanumeric	Corresponds to FeeCode (9882) in Cboe FIX.
			Indicates fee associated with an execution. Fee codes are published in the pricing schedule. New fee codes may be sent with little or no notice. Members are encouraged to code their systems to accept unknown fee codes.

©2019 Cboe Global Markets, Inc.

Г			
FloorDestination	4	Text	Corresponds to <i>FloorDestination</i> (22100) in Cboe FIX.
			Specifies a default PAR workstation (ex. W001) to route to on the floor (or "PARO" to route to the Floor PAR Official of the underlying symbol) if not specified on inbound messages.
			C1 only.
FloorRoutingInst	1	Alphanumeric	Corresponds to FloorRoutingInst (22303) in Cboe FIX.
			D = Direct (do not attempt to process electronically) E = Electronic only
			X = Route to floor if unable to process electronically
			The default value for any given port can be changed by requesting an update to the "Default FloorRoutingInst" port attribute.
			C1 only.
FrequentTraderID	6	Text	Corresponds to FrequentTraderId (21097) in CFE FIX.
			Identifies the frequent trader program in which the order is participating.
			C1 only.
GiveUpFirmID	4	Alpha	Corresponds to GiveupFirmID (9946) in Cboe FIX.
			For the Agency Side, this field must equal the value of ClearingFirm (EFID). Each Contra allocation will use this field instead of ClearingFirm for clearing information. C1 and EDGX only.
LastPriority	1	Alphanumeric	Corresponds to <i>LastPriority</i> (9849) in Cboe FIX.
,			When enabled, allocation will go to other participants' responses before requiring the Contra Order to satisfy remaining contracts of the Agency Order. Mutually exclusive with AutoMatch.
			Ø = Disabled (Default)1 = Enabled
			C1 and EDGX only.
LastPx	8	Binary Price	Corresponds to <i>LastPx</i> (31) in Cboe FIX.
		-	Price of this fill.
LastShares	4	Binary	Corresponds to <i>LastShares</i> (32) in Cboe FIX.
			Executed share quantity.
LeavesQty	4	Binary	Corresponds to <i>LeavesQty</i> (151) in Cboe FIX.
•			Quantity still open for further execution. If zero, the order is complete.
LegCFICode	6	Alphanumeric	Corresponds to LegCFICode (608) in Cboe FIX.
			CFI Code for leg. Required if LegSymbol is in OSI format.
			OP = Options Put OC = Options Call E = Equity (C1 only)
			C1, C2, and EDGX only.

©2019 Cboe Global Markets, Inc.

LegMaturityDate	4	Date	Corresponds to <i>LegMaturityDate</i> (611) in Cboe FIX. Required if <i>LegSymbol</i> is in OSI format. C1, C2, and EDGX only.
LegStrikePrice	8	Binary Price	Corresponds to <i>LegStrikePrice</i> (612) in Cboe FIX. Option strike price. System maximum is 999,999.99. Must be non-negative. Required if <i>LegSymbol</i> is in OSI format. C1, C2, and EDGX only.
MarketingFeeCode	2	Alphanumeric	Corresponds to MarketingFeeCode (5937) in Cboe FIX. P = Penny Pilot N = Non-Penny Pilot X = Not Eligible for Marketing Fees C1 and EDGX only.
MassCancel Legacy method to be deprecated at date TBD	1	Alphanumeric	Corresponds to MassCancel (7693) in Cboe FIX. Indicates that a mass cancellation is being performed. 1 or 3 = Cancel all orders that match RiskRoot or CustomGroupID, regardless of ClearingFirm. 2 or 4 = Cancel all orders that match the given RiskRoot or CustomGroupID and ClearingFirm. Values 3 and 4 are similar to 1 and 2, respectively, but individual Order Cancelled messages will not be sent for each order cancelled. Instead, a Mass Cancel Acknowledgement message with MassCanceID and CancelledOrderCount will be sent once all cancels have been processed. For Purge Orders messages, the Mass Cancel Acknowledgement message may always be requested by sending a MassCanceIID in the Purge Order message, regardless of the value of the MassCanceI field. MassCanceI requests will not cancel initiating orders for AIM Auctions.
MassCancelID	20	Text	Corresponds to MassCancelID (7695) in Cboe FIX. Copied from the MassCancelID passed on the original Cancel Order or Purge Order message.
MassCancelInst	16	Text	Corresponds to MassCancelInst (7700) in Cboe FIX. Used for specification of Purge Orders functionality and optionally used for specification of Mass Cancel functionality associated with the Cancel Order message. At least one character must be provided (Clearing Firm Filter). Contiguous characters must be specified up to total length. Truncated/unspecified characters will default to values indicated (D) below. 1st Character: Clearing Firm Filter A = No filtering by clearing firm relationship is performed. F = All orders that were sent under the clearing relationship specified in ClearingFirm optional field. If "F" specified and the ClearingFirm field is not provided, the Mass Cancel or Purge Orders will be rejected. If "F" specified and the ClearingFirm field is provided but is blank (NULL), the Mass Cancel or Purge Orders will

©2019 Cboe Global Markets, Inc.

			be treated like "A", and no filtering by clearing firm relationship is performed. 2nd Character: Acknowledgement Style M = (D) Order Cancelled messages are sent for each cancelled order. If "M" is set and the MassCancellD optional field is specified, the MassCancellD value is ignored. S = A single Mass Cancel Acknowledgement message is sent once all cancels have been processed. The MassCancellD optional field must be specified or the Mass Cancel or Purge Orders will be rejected. B = Both individual Order Cancelled and Mass Cancel Acknowledgement messages will be sent. Also requires MassCancellD optional filed to be specified or the Mass Cancel or Purge Orders will be rejected. 3rd Character: Lockout Instruction N = (D) No lockout L = Lockout until corresponding RiskReset received. Lockout
			can be used only with Clearing Firm Filter set to "F", otherwise the Mass Cancel or Purge Orders will be rejected. Lockout will apply to all New Order and Modify Order messages for the ClearingFirm (and ProductName or CustomGroupIDs, if specified), regardless of other filtering in the Purge Orders or Cancel Order message.
			4th Character: Instrument Type Filter (C1, C2, and EDGX Only) Value will be ignored on BZX Options. B = (D) Cancel both single leg and complex orders S = Cancel single leg orders only C = Cancel complex orders only
			Sth Character: GTC Order Filter C = (D) Cancel GTC and GTD orders P = Don't cancel (preserve) GTC and GTD orders
			If the <i>RiskRoot</i> optional field is specified, it must contain a valid symbol (e.g., "MSFT"), in which case only orders associated with the specified <i>RiskRoot</i> will be cancelled.
			A self-imposed lockout can be released using the <i>RiskReset</i> field of the New Order or New Complex Order message. If <i>RiskRoot</i> optional field is specified, a symbol level reset is required, otherwise a firm level reset is required to release a lockout. For more information, refer to the 'Cboe Risk Management Specification'.
MassCancelLockout	1	Alphanumeric	Corresponds to MassCancelLockout (7697) in Cboe FIX.
			0 = No Lockout 1 = Lockout
			Members may initiate a new self-imposed order lockout in conjunction with a mass cancel for all resting orders and inflight orders. The value of 1 is only applicable in conjunction with <i>MassCancel</i> values of 2 and 4; other usage results in a reject.
MaturityDate	4	Date	Corresponds to <i>MaturityMonth</i> (200) and <i>MaturityDay</i> (205) in Cboe FIX.

©2019 Cboe Global Markets, Inc.

MaxFloor	4	Binary	Corresponds to MaxFloor (111) in Cboe FIX.
			Portion of <i>OrderQty</i> to display. The balance is reserve. 0 displays the entire quantity. The displayed quantity of each order at a price level is decremented rirst. When displayed quantity is fully decremented, it is reloaded up to <i>MaxFloor</i> from reserve.
			Default = 0
			An order with a <i>MaxFloor</i> greater than 0 will be rejected for Cboe proprietary classes (such as DJX, RUT, SPX, XSP, and VIX).
MaxRemovePct	1	Binary	Corresponds to MaxRemovePct (9618) in Cboe FIX.
			For Post Only At Limit (RoutingInst = Q), what percentage of the order quantity which remains after price improvement may be removed at the limit.
			Must be 0 for non-Post Only At Limit orders.
			0 = Don't Remove any shares at limit price 100 = Remove any amount at limit price
			BZX only.
MinQty	4	Binary	Corresponds to MinQty (110) in Cboe FIX.
			Minimum fill quantity for IOC orders which only interact with liquidity on the target book. Ignored for other orders.
MultiClassSprd	1	Alpha	Corresponds to MultiClassSprd (22004) in Cboe FIX.
			Indicates an option is part of a multi-class spread.
			N = (Default) No
			Y = Yes
			C1 only.
MultilegReportingType	1	Alphanumeric	Corresponds to MultilegReportingType (442) in Cboe FIX
			Indicates the type of Order Execution message.
			 1 = Single-leg instrument 2 = Individual leg of multi-leg instrument 3 = Entire multi-leg instrument package
			C1, EDGX and C2 only.
NoOfSecurities	4	Binary	Corresponds to NoOfSecurities (8641) in Cboe FIX.
•			Indicates the number of securities created by the member in this trading session.
			C1, C2, and EDGX only.
OpenClose	1	Alphanumeric	Corresponds to OpenClose (77) in Cboe FIX.
			Indicates status of client position in the option.
			O = Open C = Close N = None*
			*Orders with a <i>Capacity</i> of M or N will not be required to specify <i>OpenClose</i> on their orders or may specify a value of N. A <blank> will be sent to the OCC.</blank>
			Contracts which are limited to closing only transactions with an <i>OpenClose</i> value of O will be rejected unless the <i>Capacity</i> field is M (Market Maker) and <i>TimeInForce</i> is 3 (Immediate or Cancel).

©2019 Cboe Global Markets, Inc.

OrderOrigin	3	Alphanumeric	Corresponds to <i>OrderOrigin</i> (9465) in Cboe FIX.
			Floor acronym of Market Maker on whose behalf this order is being entered by a floor broker.
			C1 only.
OrderQty	4	Binary	Corresponds to OrderQty (38) in Cboe FIX.
2.20,		•	Order quantity. System limit is 999,999 contracts.
OrdType	1	Alphanumeric	Corresponds to OrdType (40) in Cboe FIX.
			1 = Market 2 = Limit (default) 3 = Stop 4 = Stop Limit
			Market implies <i>TimeInForce</i> of IOC (3).
			Stop/Stop Limit orders must be set to <i>TimeInForce</i> = "0" (DAY), "1" (GTC), or "6" (GTD).
OrigClOrdID	20	Text	Corresponds to OrigClOrdID (41) in Cboe FIX.
OrigCrossID	20	Text	Corresponds to OrigCrossID (551) in Cboe FIX.
ORS	1	Alpha	Corresponds to ORS (22003) in Cboe FIX.
			Order router subsidy eligibility (used for billing purposes).
			N = (Default) No
			Y = Yes
			C1 only.
PreventMatch	3	Alpha	Corresponds to <i>PreventMatch</i> (7928) in Cboe FIX.
			Three characters:
			1st character - MTP Modifier: N = Cancel Newest 0 = Cancel Oldest B = Cancel Both S = Cancel Smallest D = Decrement larger / Cancel Smaller d = Same as D above, but only decrement LeavesQty. Do not restate OrderQty.
			2nd character - Unique ID Level: F = Prevent Match at Firm(Member) Level M = Prevent Match at EFID Level
			3rd character - Trading Group ID (optional): Member specified alphanumeric value 0-9, A-Z, or a-z.
			The Unique ID level (character 2) of both orders must match to prevent a trade. If specified on both orders, Trading Group ID (character 3) must match to prevent a trade.
			The MTP Modifier (character 1) of the inbound order will be honored, except that if the inbound order specifies Decrement and the resting order does not, and the resting order is larger, then both orders will be cancelled. This exception is to protect the order entry software for the resting order from receiving an unexpected restatement message.
			If order entry software is prepared to handle unexpected restatement messages, this exception may be override at the port level by requesting "Allow MTP Decrement Override" functionality.

©2019 Cboe Global Markets, Inc.

			Uses of MTP Modifier D or d and users of "Allow MTP Decrement Override" functionality must be prepared to receive an Order Restated message that decrements LeavesQty (and, for method D, OrdQty as well). On a New Order Cross, only N and O are supported for the MTP modifier. MTP instructions on AIM orders will be used to prevent executions against AIM responses only; they will permit executions against resting or unrelated orders. Responses may only employ N (Cancel Newest) in which case the response will be cancelled and the auction order will continue. On a New Order Cross, this field is only applicable to the Agency order.
Price	8	Binary Price	Corresponds to <i>Price</i> (44) in Cboe FIX.
			Limit price.
			Required for limit orders ($OrdType = 2$). If specified on market order ($OrdType = 1$), the order will be rejected.
			This field is also used to specify an optional cap price for pegged orders.
			For complex orders, net pricing of the strategy. Four implied decimal places. (EDGX and C2 only)
			Buy orders:
			Positive value, Debit
			Negative value, Credit
			• Even order, 0 (Zero)
			Sell orders:
			Positive value, Credit
			Negative value, Debit
			• Even order, 0 (Zero)
PriceType	1	Alphanumeric	Corresponds to <i>PriceType</i> (423) in Cboe FIX.
			 Ø = Fixed cabinet trade price 2 = (Default) Price per unit (contract) 3 = Fixed amount (cash spread pricing) – only for complex orders routed to the floor
			C1 only.
PutOrCall	1	Alphanumeric	Corresponds to PutOrCall (201) in Cboe FIX.
			0 = Put 1 = Call
RevisedLegs	1	Alphanumeric	Indicates if the legs on the created complex strategy have been reordered from the original request.
			If the legs were reordered, the order of the <i>OpenClose</i> fields on a New Complex Order must be the order returned by the exchange, not the order from the original request.
			1 = Legs were not reordered 2 = Legs were reordered
			C1, C2, and EDGX only.

©2019 Cboe Global Markets, Inc.

RiskReset	8	Text	Corresponds to RiskReset (7692) in Cboe FIX.
			For use by customers using Cboe's Risk Management tools to reset or release EFID Group, EFID, Risk Root or Custom Group ID level lockout conditions resulting from risk profile trips or self-imposed lockouts issued via Cancel Order or Purge Orders messages.
			Single Character Values:
			S = Risk Root level risk/lockout reset F = EFID level risk/lockout reset C = CustomGroupID lockout reset G = EFID Group level risk/lockout reset
			Values may be combined together to allow for resets of multiple risk trips or self-imposed lockouts in a single message. For example, "GS", "SC", "FC", and "SFC" are all acceptable values.
			When a resting or inbound order is executed and a Risk Root level risk profile limit is reached, resting orders on the associated Risk Root will be cancelled and inbound orders on the Risk Root will be rejected until this field is filled with the value S on a subsequent New Order or New Complex Order message corresponding to a symbol on the same Risk Root. All active Risk Root level rules in the risk profile are reset at this time. Individual rules cannot be reset on their own.
			If an EFID-level rule is tripped, this tag can be filled with the value "F" to reset all EFID-level rules. While this will reset EFID-level rules, it is possible that both EFID and Risk Root level rules are currently tripped. Setting this field to "F" will not clear Risk Root-level rules and the order may still be rejected. To clear both Risk Root and EFID-level rules, set this field to "SF" to reset all associated Risk Root and EFID-level lockouts.
			If orders have been locked out at the <i>CustomGroupID</i> level, inbound orders for the locked <i>CustomGroupID</i> will be rejected until this field is filled with the value C on a New Order or New Complex order that uses the locked <i>CustomGroupID</i> .
			EFID and EFID Group resets are not allowed by default. Customers should contact the Cboe Trade Desk to reset these limits or request a change to the "EFID Risk Reset" port setting using the Logical Port Request form.
			For more information, refer to the 'Cboe US Options Risk Management Specification'.
RiskRoot	6	Text	Corresponds to Symbol (55) in Cboe FIX.
			The underlying symbol.
RouteDeliveryMethod	3	Text	Corresponds to RouteDeliveryMethod (9350) in Cboe FIX.
			 RTI = Route to improve (default if not specified). Ability to receive price improvement will take priority over speed of execution. RTF = Route to Fill. Speed of execution will take priority over potential price improvement.
			Only applicable to <i>RoutStrategy</i> = ROUT
L	<u> </u>		only applicable to houtstrategy - NOOT

©2019 Cboe Global Markets, Inc.

RoutingFirmID	4	Alpha	Corresponds to RoutingFirmID (7933) in Cboe FIX.
January San Carlot		·	Used to optionally convey the routing firm of the order. If supplied, value must be a valid member EFID.
			May be combined with <i>MassCancel</i> values 2 or 4, or <i>MassCancelInst</i> with Firm Filter set to "F" in a mass cancel request.
			C1, C2, and EDGX only.
RoutingInst	4	Text	Corresponds to RoutingInst (9303) in Cboe FIX.
			<pre>1st character: B = Book Only (not routable, will remove from local book) P = Post Only (not routable) 1 Q = Post Only at Limit (removes liquidity that improves upon limit price and up to MaxRemovePct of remaining OrdQty at limit price) (BZX only) R = Routable S = Super Aggressive - Cross or Lock (order will be removed from the book and routed to any quote that is locking or crossing the order) X = Aggressive - Cross Only (order will be removed from the book and routed to any quote that is crossing the order) 2nd character (C1 and EDGX only):</pre>
			L = Do Not Expose order via Step-Up Mechanism (SUM) S = Expose order via Step Up Mechanism (SUM) ²
RoutingInst	4	Text	Corresponds to RoutingInst (9303) in Cboe FIX.
(Complex)			 1st character: B = Book Only (will remove from local book), allowed to interact with both single-leg and other complex orders. D = Complex Book Only, allowed to interact with other complex orders only³. P = Post Only (adds liquidity only)
			2nd character: L = Do Not Expose order via Complex Options Auction (COA) S = Expose order via Complex Options Auction (COA) ⁴
			C1, C2, and EDGX only.
RoutStrategy	6	Text	Corresponds to RoutStrategy (9400) in Cboe FIX.
			All exchanges: ROUT = Book + Street DIRC ⁵ = Book + Directed IOC or Directed ISO if ExecInst = f SWPA = (default) Book + Sweep Street

©2019 Cboe Global Markets, Inc.

¹ Post Only orders on EDGX with DisplayIndicator (Fix Tag 9479) = R will be cancelled back even if they would be immediately executable with price improvement.

² Routable Orders identified with *RoutingInst* = R, RS, S, SS, X or XS, and *RoutStrategy* = ROUT, and *AuctionId* not supplied, or Non-Routable Orders identified with *RoutingInst* = BS and *ExecInst* not f and *TimeInForce* not 4 and *MinQty* not supplied will participate in the Step-Up Mechanism (SUM) before routing, booking, or cancelling back.

³ Only valid with *TimeInForce* values of 0 (Day) or 3 (IOC), otherwise order will be rejected.

⁴ All non-IOC Complex Orders will be eligible for Complex Options Auction (COA) unless otherwise specified.

⁵ Field *ExDestination* must be populated with *RoutStrategy* = DIRC. Must be specified when sending non-book only ISO, otherwise the order will be rejected.

SecondaryExecID	8	Binary	Field indicates whether a fill or partial fill is a complex instrument fill or a single leg fill that comprises a complex execution.
			 If SecondaryExecID (527) is not present, the fill is a single leg fill only.
			 If SecondaryExecID (527) is present and is the same as the ExecID (17) the fill represents a complex execution for which associated single leg fills will follow.
			 Single leg fills associated with a complex execution will contain a SecondaryExecID (527) of the associated complex execution.
			C1, C2, and EDGX only.
SecondaryOrderID	8	Binary	Corresponds to SecondaryOrderID (198) in Cboe FIX.
			Denotes an alternative <i>OrderID</i> which is present on Cboe market data feeds (for example, to hide that a reserve (iceberg) order has reloaded). Or, <i>OrderID</i> of the contra side of a prevented match.
SenderLocationID	1	Alphanumeric	Corresponds to SenderLocationID (142) in Cboe FIX.
			F = Floor
SessionEligibility	1	Alpha	Corresponds to <i>TradingSessionID</i> (22017) in Cboe FIX.
			A = Order participates in both Global and Regular Trading Hours (C1, C2, and EDGX only) R = (default) Order participates in Regular Trading Hours
Side	1	Alphanumeric	Corresponds to <i>Side</i> (54) in Cboe FIX.
Side		7 upitatianierie	1 = Buy 2 = Sell
StopPx	8	Binary Price	Corresponds to StopPx (99) in Cboe FIX.
			Stop price. Required if <i>OrdType</i> = 3 (Stop) or 4 (Stop Limit). Stop and Stop Limit orders will only be triggered off Last Sale Eligible trades.
StrategyID	1	Alphanumeric	Corresponds to StrategyID (22002) in Cboe FIX.
			Used to declare when a strategy is used.
			C = Conversion R = Reversal M = Merger S = Short stock interest J = Jelly roll
			C1 only.
StrikePrice	8	Binary Price	Corresponds to StrikePrice (202) in Cboe FIX.
			Strike Price for option, 0 – 999,999.99

©2019 Cboe Global Markets, Inc.

SubLiquidityIndicator	1	Alphanumeric	Additional information about an execution. Cboe may add additional values without notice. Members must gracefully ignore unknown values. ASCII NUL (0x00) = No Additional Information S = Execution from order that set the NBBO B = Step Up Mechanism U = Market Turner (C1 Only) b = AIM (C1 and EDGX Only) C = Carried D = Done For Day q = QCC (C1 and EDGX Only) s = SAM (C1 Only) Effective on EDGX TBD
Symbol	8	Alphanumeric	Corresponds to <i>Symbol</i> (55) in Cboe FIX. Entire Cboe format symbol
TargetPartyID	4	Alpha	Corresponds to TargetPartyID (1462) in Cboe FIX.
			A valid Parent ID of the Directed Market Maker (EDGX only) or Preferred Market Maker (C1 only). Required for directed orders.
			On a New Order Cross, this field is only applicable to the Agency order.
			C1 and EDGX only.
TiedHedge	1	Alpha	Corresponds to <i>TiedHedge</i> (22018) in Cboe FIX.
			Order is a tied hedge.
			N = (Default) No Y = Yes
			C1 only.
TimeInForce	1	Alphanumeric	Corresponds to <i>TimeInForce</i> (59) in Cboe FIX.
			 0 = Day - (Default) Expires at end of market day. 1 = GTC* - Remains in system until executed, cancelled or option expires. 2 = At the Open - Will remain queued and only interact in the 'Cboe Opening Process' (BZX, C2, and EDGX only) or the Cboe Opening Auction (C1 only). 3 = IOC - Portion not filled immediately is cancelled. Market orders are implicitly IOC for non-complex orders. 4 = FOK - An IOC where the entire size must be filled, else the order will be cancelled back. Not compatible with Step-Up Mechanism (SUM). 6 = GTD* - Expires at specified ExpireTime for a specified day. 7 = At the Close - Orders held for execution until 180 seconds before series is scheduled to close. *Bulk Quoting Ports will only support TimeInForce values of Day or GTD with a same day expiration on C1, C2, and EDGX.
TradeThroughAlertType	1	Alphanumeric	Corresponds to <i>TradeThroughAlertType</i> (21098) in Cboe FIX.
			Indication of a type of trade through.
			1 = NBBO 2 = BBO (local best bid or offer) 3 = SBBO (market quote of complex derived by legs) 4 = Book trade through (trade through customer size) 5 = Duo Dillippes trade through
			5 = Due Dilligence trade through

©2019 Cboe Global Markets, Inc.

Only present when order is fully or partially booked. If price had to be adjusted to a less aggressive value for some reason, then the adjusted price will be reported here, otherwise equals price.
price.

8 Reason Codes

8.1 Order Reason Codes

The following is a list of all order related reason codes used by Cboe. These reason codes are used in a variety of contexts (order cancellations and order rejections). All reasons are not valid in all contexts. Cboe may add additional reason codes without notice. Members must gracefully ignore unknown values.

A = Admin

+ = Risk management EFID Group level

D = Duplicate identifier (e.g., ClOrdID)

H = Halted

I = Incorrect data center

J = Too late to cancel

K = Order rate threshold exceeded

L = Order would lock or Cross NBBO

M = Order size exceeded

N = Ran out of liquidity to execute against

0 = ClOrdID doesn't match a known order

P = Can't modify an order that is pending fill

Q = Waiting for first trade

R = Routing Unavailable

T = Fill would trade through the NBBO

U = User requested

V = Would wash

W = Add liquidity only order would remove

X = Order expired

Y = Symbol not supported

Z = Unforeseen reason

c = Only Close transactions accepted

f = Risk management EFID or Custom Group ID level

m = Market access risk limit exceeded

o = Max open orders count exceeded

r = Reserve reload

s = Risk management risk root level

w = Would remove on unslide

x = Crossed market

y = Order received by Cboe during replay

z = Session End

©2019 Cboe Global Markets, Inc.

8.2 Quote Reason Codes

The following is a list of all quote reason codes used by Cboe. All reasons are not valid in all contexts. Cboe may add additional reason codes without notice. Members must gracefully ignore unknown values.

- C = Invalid EFID (ClearingFirm)
- D = Invalid WashId
- E = Invalid SessionEligibility
- F = Not enabled for quotes
- I = Incorrect data center
- L = Invalid QuoteCnt
- M = Symbols not on same matching engine
- P = Invalid PostingInstruction
- Q = Invalid QuoteUpdateID
- R = Risk root does not match across quotes
- S = Symbol not found
- W = Invalid WashPreventType
- a = Admin
- c = Invalid Capacity
- d = Close only
- f = Risk management EFID or Custom Group ID level
- m = Invalid WashMethod
- o = Invalid Open/Close
- p = Risk management risk root level
- r = Invalid Remove
- s = Invalid Side
- u = Sybmol range unreachable
- y = Quote received by Cboe during replay

©2019 Cboe Global Markets, Inc.

9 List of Message Types

9.1 Member to Cboe

Message Name	Level	Туре	Sequenced

Quote Update Rejected	Application	0x58 No	

10 Port Attributes

The table below lists BOE port attributes that are configurable on the port or firm level. Changes to these attributes can be made by contacting the Cboe Trade Desk. Port Attribute changes made intra-day by the Cboe Trade Desk will not affect existing quotes or orders. In order for the desired intra-day port attribute to be applied to existing quotes or orders, you must first cancel or send a quote with zero price and size and then re-enter the order or quote.

Attribute	Default	Description
Allowed Clearing Executing Firm ID(s) *	All EFIDS	Executing Firm ID(s) allowed for trading on the port.
Default Executing Firm ID	None	Default Executing Firm ID to use if none is sent on a New Order Or New Complex Order.
Allow Test Symbols Only	Disabled	Allow or disallow orders in non-test symbols
Allow ISO *	Yes	Allow or disallow ISO orders.
Allow Directed ISO *	Yes	Allow or disallow ISO orders directed to other market centers.
Default Routing Instruction ⁺	9303=RS 9350=RTI 9400=SWPA	Specifies a default value for routing. Fields can be overridden at the order level. The defaults are RoutingInst = RS, RouteDeliveryMethod = RTI, and RoutStrategy = SWPA.
Maximum Order Size *	25,000	Maximum order quantity
Maximum Order Dollar Value *	Unlimited	Maximum dollar value per order.
Default Price Sliding	BZX = S EDGX/C2 = P	Default price sliding behavior. See <i>DisplayIndicator</i> for details.
Cancel on Disconnect	All	Cancels open orders upon order handler session disconnect; both graceful and ungraceful. If Cancel On Disconnect is set, open orders in Symbols that are not in Closed state at the time of the disconnect are cancelled. All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled BOE Quoting ports require Cancel on Disconnect set to All or Day. Default will be used if not specified.
Cancel on ME Disconnect	All	Controls whether orders are cancelled or preserved on a Matching Unit failover and provides for the ability to preserve GTC/GTD orders. In any event, if a failover takes longer than 5 minutes, all orders are cancelled (including GTC/GTD Orders). All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled BOE Bulk Quoting ports require Cancel on ME Disconnect set to All or Day. Default will be used if not specified.
Market Maker Reject if Cancel on Disconnect disabled	No	Rejection of Market Maker or Away-Market Maker orders if Cancel on Disconnect is not enabled. Non-Market Maker capacity order swill be unaffected with this confuration.

©2019 Cboe Global Markets, Inc.

Δ.		
Send Trade Breaks [^]	No	Enables sending of Trade Cancel or Correct messages.
Default MTP Value *^+	None	Specifies default value for PreventMatch.
Allow MTP Decrement Override *^	No	Overrides the exception that requires both the resting and inbound order to be marked as "Decrement".
Allow Sponsored Participant MTP Control *^	No	Allow Sponsored Participant to override port default for match trade prevention by using <i>PreventMatch</i> on the order level.
Cancel on Reject ⁺	No	Cancels an order upon a cancel or modify reject.
Cancel on Regulatory Halt	All (BZX and EDGX Only) None (C1 and C2 Only)	Cancels open orders upon receipt of a Regulatory Halt. All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled
Fat Finger Protection *\$	BZX/EDGX = None C2 = See Web Portal Port Controls Specification for defaults	Orders entered through the NBBO by a specified percentage or dollar based limit price tolerance will be rejected. Limits may be different for different price ranges and price ranges may vary across markets. Please see the 'Web Portal Port Controls Specification' for complete details.
Reject Orders on DROP Port Disconnect *	No	If all associated Standard FIX DROP ports associated with an order entry session experience disconnection, new orders will be rejected until at least one Standard FIX DROP port session has been reestablished. Note this parameter does not apply to Order-By-Order
		drop ports (ODROP).
Reject Orders on DROP Port Timeout (seconds) *	30 seconds	Only applicable if "Reject Orders on DROP Port Disconnect" has been enabled. When the last Standard FIX DROP port associated with an order entry session has disconnected, begin rejecting orders on the order entry session if a Standard FIX DROP session has not been reestablished within this timeout.
		Minimum value allowed is 0 seconds.
Cancel Open Orders on DROP Port Disconnect *	None	Only applicable if "Reject Orders on DROP Port Disconnect" has been enabled. When the last Standard FIX DROP port associated with an order handler session has disconnected, open orders, associated with the session are cancelled. All = Cancel Day and GTC/GTD orders Day = Cancel only Day orders None = Disabled
		Note this parameter applies to Standard FIX DROP ports and not Order-By-Order DROP ports (ODROP).

©2019 Cboe Global Markets, Inc.

Carried Order Restatements	No	If the Carried Order Restatements port attribute is set, unsolicited Order Acknowledgement messages representing GTC/GTD orders loaded by the system at startup will be sent after the Login Response message and before any other messages for each product. Note that Carried Orders are restated to customers using the Order Acknowledgement messages with BaseLiquidityIndicator=A and SubLiquidityIndicator=C. Note that any changes made to any port attribute will not be enforced on carried GTC orders. Members who wish to apply updated port attributes to resting GTC orders must cancel those orders, and then resubmit them following the effective time of the port attribute change.
Done For Day Restatements	No	If the Done For Day Restatements port attribute is set, unsolicited Order Acknowledgement messages representing GTC/GTD orders that will be carried into the next session will be sent after the end of the trading session and before the system is recycled. Note that Done For Day Restatements are restated to customers using the Order Acknowledgement messages with BaseLiquidityIndicator=A and SubLiquidityIndicator=D.
Notional Cutoff Aggregation	None	Gross exposure = CBB + CBO + CEB + CEO
Methods *\$		Net exposure = (CEO + CBO) - (CEB + CBB)
		On a given port, Cboe will calculate an track four values:
		CBB = Cumulative Notional Booked Bid Value The sum of limit price x size for all booked sell limit orders.
		CBO = Cumulative Notional Booked Offer Value The sum of limit price x size for all booked sell limit orders.
		CEB = Cumulative Notional Executed Bid Value The sum of size x trade price for all executed buy orders
		CEO = Cumulative Notional Executed Sell Value The sum of size x trade price on all executed sell orders
Gross Daily Risk Limit Order Notional Cutoff * ^{\$}	None	Results in rejects for limit orders when gross exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Gross Daily Risk Market Order Notional Cutoff *\$	None	Results in rejects for market orders when gross exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Net Daily Risk Limit Order Notional Cutoff *\$	None	Results in rejects for limit orders when net exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.
Net Daily Risk Market Order Notional Cutoff *\$	None	Results in rejects for market orders when net exposure of limit orders exceeds this value for this port. Maximum whole dollar value of \$1 billion/port.

©2019 Cboe Global Markets, Inc.

Default Attributed Quote **	Х	Default value for <i>AttributedQuote</i> . May override at order level.
!		C† = Attribute ClientIDAttr only (C1 only)
!		N = Don't Attribute (may override at order level)
		Y = Attribute EFID only
!		Z = Attribute EFID and ClientIDAttr
		X* = (Default) Never Attribute (may not be overriden at order level)
		*On EDGX and BZX, this setting may only be changed after executing Attribution Addendum to Exchange User Agreement.
Crossed Market Cancel / Reject \$	No	Reject new orders when the NBBO in the security is crossed. Routable orders will have any remaining quantity cancelled back when the order returns to the book. Order modifications which cause a loss in priority will result in a cancel of the original order if the NBBO is crossed upon receipt of the modify request.
Duplicative Order Protection Time Threshold ^{\$}	None	Time window, in seconds, for Duplicative Order Protection Check
Duplicative Order Protection Order Count Threshold ^{\$}	None	Number of orders with the same ClearingFirm, Price, OrdQty, and Symbol that must be seen within the Duplicative Order Time Threshold to initiate Duplicative Order Protection Action.
Duplicative Order Protection Action ^{\$}	1	Action taken when Duplicative Order Protection criteria is met:
!		1 = Not enabled.
		2 = Reject new orders for the remainder of
!		Duplicative Order Time Threshold.
		3 = Disable port for <i>ClearingFirm</i> . Must call Cboe Trade Desk to reenable.
EFID Risk Reset	Disabled	Configures how risk may be reset after a risk trip.
!		Disabled = (Default). Will require manually
		resetting all EFID Group and EFID-Level Risk trips by contacting the Trade Desk.
		Enabled = Will allow EFID Group and EFID-level
!		Risk resets using RiskReset of "F" or "G".
Post Order Rate Threshold	5,000 msgs/s	The maximum allowed message rate on the session. When the first non-session level message is received, a one second window begins. During the second no more than 4,999 additional non-session level messages will be allowed within that window. If the rate is exceeded, all new orders in the time window are rejected, modifies are treated as cancels, and cancels are processed.
		Maximum value is 5,000 msgs/sec.
		For Bulk Quoting ports, the default threshold is unlimited.
Symbol Order Rate Threshold	5,000 msgs/s	Functions the same as the Port Order Rate Threshold, but is calculated at the symbol level. It is capped by the Port Order Rate Threshold.
		Maximum value is 5,000 msgs/sec.
		For Bulk Quoting ports, the default threshold is unlimited.

©2019 Cboe Global Markets, Inc.

Default Account	None	Default <i>Account</i> to be used if none is sent on inbound messages. Allows 16 characters or less (ASCII 33-126) but a max of 10 characters will be passed through to the OCC Customer ID Field.
Default ClearingOptionalData	None	Default <i>ClearingOptionalData</i> to be used if none is sent on inbound messages. Allows 16 characters or less (ASCII 33-126).
Default FloorRoutingInst (C1 only)	E	 D = Direct. Do not attempt to process electronically E = Electronic only X = Route to floor if unable to process electronically.
Default FloorDestination (C1 only)	None	Specifies a default PAR workstation (ex. W001) to route to on the floor (or "PARO" to route to the Floor PAR Official of the underlying symbol) if not specified on inbound messages. 4 characters or less (ASCII 33-126).
Default <i>EquityPartyID</i> C1 Only	None	Default EquityPartyID to be used if none is specified on inbound messages.
Default ClientIDAttr	None	Default <i>ClientIDAttr</i> to be used if none is specified on inbound messages.

^{*} Sponsored Participants require written approval from Sponsors to update these settings on ports associated with a Sponsor's MPID.

11 Support
